

SkinWhite-BLE

FACT SHEET

Description: Skin lightening agent made from bearberry leaves extract (arctostaphylos uva-ursi) & vitamin C (magnesium ascorbyl phosphate). Clear yellowish solution. Soluble in water. CAS# 84776-10-3, 18962-61-3, 56-81-5.

INCI Name: Arctostaphylos uva-ursi leave extract, magnesium ascorbyl phosphate, glycerin.

Properties: Inhibits skin cells to produce melanin pigments by inhibiting the tyrosinase activity by reducing melanin biosynthesis, effectively lightens age spots & dark skin areas, very popular in Asian countries to depigment the skin.

Use: Recommended use level 4 - 8%, only 1% when combined with exfoliants, add to the water phase (not over 60oC) or to finished products, stable in the pH-range of 4.0 to 7.0.

Application: All kinds of skin-lightening products including lotions, creams, fluids, makeup products.
