

Henna Hair Dye

FACT SHEET

Description: Herbal pigment derived from the leaves of the shrub Lawsonia Inermis. Contains stabilizers & additional pigments for specific shade (paraphenylenediamine, p-aminophenol, citric acid, barium peroxide, magnesium carbonate). Fine powder, faint herbal odor. Dispersible in water & oil. CAS#: 83-72-7.

INCI Name: Henna (2-hydroxy-1,4-naphthoquinone).

Properties: Conditions the hair & adds shine (if used diluted in hair care products), colors hair temporarily for 10-20 days (if used concentrated in hair color pastes).

Use: Hair shine or conditioning: add henna to shampoos & conditioners at 5-15%. Hair coloring (1 application): make thick paste with henna (100-300g), hot water, lemon juice & some vegetable oil (apply for 20-40min).

Applications: Hair dyes, hair toners, hair conditioners. Note: for hair care use only.
