

## Jojoba Pearls

### FACT SHEET

**Description:** Jojoba pearls are tiny, spherically shaped beads consisting of hydrogenated jojoba oil (= jojoba wax), round shape warrants effective but gentle exfoliation, not animal tested. Small, round beads, faint odor. Insoluble in water. Sizes: fine pearl size is 40-60 microns (colors: cotton white), ultrafine pearl size is 20-40 microns (colors: juicy orange, aloe green, & lavender blue). CAS# 92457-12-0, 61789-91-1.

**INCI Name:** Jojoba wax spheres.

**Properties:** Highly effective exfoliation without the abrasiveness like other natural or synthetic exfoliants, provides elegant emolliency, non-occlusive & non-comedogenic, very mild & suitable for sensitive skin.

**Use:** Can be added to formulas as is, typical final concentration 1-10%.

**Applications:** Shampoos, speciality bar soap, lotions, creams, body washes, body scrubs, shower gels.
