

Red Mica

FACT SHEET

Description: Natural shimmer pigment derived from the mineral Muscovite Mica (potassium aluminum silicate), coated with titanium dioxide & iron oxide, cosmetic-grade fineness (medium particle size 19um), permitted exempt color for cosmetic use. Insoluble, but miscible in liquids (sinks to bottom in thin liquids). CAS# 12001-26-2, 13463-67-7, 1345-25-1.

INCI Name: Mica, titanium dioxide, iron oxide.

Properties: Gives deep color with shimmering & pearlizing luminiscence.

Use: Suspends best in thick bases, can be blended with other pigments.

Application: All kinds of decorative cosmetics & personal care products to add pearlizing & luster effects.
