

Easy Skin Lightening Cream with SkinWhite MSH

| Phase A | Weight % | For 100 g / 3.6 oz (by weight) |
|--|----------|--------------------------------|
| Distilled Water (diluent) | 80.5 % | 80.5 g / 2.9 oz |
| Phase B | | |
| CreamMaker Wax (emulsifier) | 2 % | 2 g / 0.1 oz / 1 tsp |
| Meadowfoam Seed Oil (emollient) | 12 % | 12 g / 0.4 oz |
| SkinWhite MSH (skin-whitener) | 2 % | 2 g / 0.1 oz / 1 tsp |
| Phase C | | |
| Vitamin E Acetate (antioxidant) | 0.5 % | 0.5 g / 12 drops |
| GelMaker EMU (thickener/emulsifier) | 2 % | 2 g / 0.1 oz 3/4 tsp |
| Paraben-DU (preservative) | 1 % | 1 g / 0.04 oz / 22 drops |

Method

Add phase B into a disinfected, heat-resistant glass beaker and heat to 80–85C/180–185F, stir, make sure the Skinwhite MSH is melted. Add phase A to another disinfected glass beaker and heat to the same temperature. Remove both beakers from the heat. Add phase A to phase B and stir well. Add phase C when the temperature has cooled to 122F/50C, then stir again well. You can further adjust viscosity with GelMaker EMU.

Properties

Novel unique skin lightening agent (undecylenoyl phenylalanine), made of natural amino acids with a lipid-residue. Inhibits skin cells to produce melanin pigments by inhibiting melanin-stimulating MSH (melanotropin), effectively lightens age spots & dark skin areas. Requires application of 1 to 6 weeks until skin whitens dependent on skin pigmentation. Product has excellent stability in cosmetics not leading to change in colors.
