#### Method

Add phase A to a disinfected, heat-resistant glass beaker and heat to 160F/71C. Add phase B into another disinfected glass beaker and heat to the same temperature to melt the ingredients. Remove both beakers from the heat. Add phase B to phase A and stir until uniform. Cool to 60C/122F then add phase C, stir well, the cream will become thicker. Then add phase D, stir again. The cream can be filled into jars.

#### Properties

Basic skin cream with precious almond oil that will soften and moisturize the skin. The active ingredient vitamin E acetate is a potent antioxidant and protects the skin from damages by reactive oxygen radicals.
