#### Method

Add phase A into a disinfected, heat-resistant glass beaker and heat to 160oF/71oC to melt the ingredients. Add phase B into a separate beaker and heat to the same temperature. Remove beakers from the heat and add phase A to B and stir well until it is a homogenous cream. Cool to 100oF/40oC and add phase C, stir again. The cream can be filled into jars.

#### Properties

Body butter cream with precious ingredients that will leave the skin feeling silky and moisturized all-day long.
