#### Method

Add phase B to a disinfected, heat-resistant glass jar and heat to 140F/60C melt the skinlift DPHP. Remove from the heat and add phase C to phase B and stir. Combine phase A and add to phase B/C stir well for at least a couple minutes until the emulsion has formed and the cream gets thicker. Add phase D one by one and stir again well. The viscosity can be adjusted by adding more of the GelMaker EMU. The cream can be filled into jars.

#### Properties

Cream-Gel that contains SkinLift DPHP, it firms the tissue by stimulating the contraction of collagen fibers with powerful anti-wrinkle action, long lasting firming and moisturizing effects. SkinTight (algae extract and pullulan) is stimulating collagen synthesis and renewal of tissue cells plus jojoba protein shows also skin tightening and moisturizing effects.
