

Even Complexion – Skin–Lightening Care

Phase A	Weight %	For 100g / 3.6 oz
Hot Distilled Water (diluent)	67.3 %	67.3 g / 2.4 oz
Xanthan Gum (thickener)	0.5 %	0.5 g / ¼ tsp
Sodium PCA (humectant)	2 %	2 g / ½ tsp
Phase B		
Isoeicosan (emollient)	10 %	10 g / 2 tsp
Jojoba Oil (emollient)	4 %	4 g / 1 tsp
CreamMaker Blend (emulsifier)	5 %	5 g / 2 tsp
Meadowfoam Seed Oil (emollient)	4 %	4 g / 1 tsp
SkinWhite MSH	2 %	2 g / ½ tsp
Vitamin E Acetate (antioxidant)	1 %	1 g / 22 drops
Cetyl Alcohol (thickener)	2 %	2 g / ¾ tsp
Phase C		
Vitamin A Palmitate (antioxidant)	0.5 %	0.5 g / 12 drops
Phenoxyethanol/SA (preservative blend)	1.5 %	1.5 g / 32 drops
Fragrance	0.2 %	0.2 g / 4 drops

Method

Add phase A into a disinfected, heat-resistant glass beaker and mix the gum thoroughly. Heat phase A to (158oF/70oC). Heat phase B in a separate beaker up to 185F/85C until the skinwhite is melted. Add phase B to phase A and stir until it is a homogenous cream. After the temperature has dropped below 100oF/38oC add phase C and stir well.

Properties

Skin whitening cream with a novel skin whitener that inhibits skin cells to produce melanin pigments. Needs up to 6 weeks of daily application to show results in lighten age spots and dark skin areas.
