Method

Add phase A into a disinfected glass jar and mix well to dissolve the gum and the allantoin, sprinkle powders into water while mixing well with a hand mixer to avoid the formation of lumps. Heat phase A to 150F/65C. Add phase B to phase A while stirring gently. Heat phase C also to 150F/65C until the ingredients are melted. Then add phase C to phase A/B and stir well until homogenous. When the temperature is below 100F/40C add phase D and stir again.

Properties

Make-up removing lotion with sulfosuccinate which is a mild cleansing agent, oils and emulsifiers help removing dirt and makeup. Use with a damp cotton pad.
