Method

Give phase A into a disinfected glass beaker and stir. Give phase B into another disinfected glass beaker and stir as well. Add phase A to phase B and stir well to form a cream-gel, stir for at least 2 minutes until gel is smooth and uniform. Add phase C one by one and stir after each ingredient. If necessary the viscosity can be adjusted further with GelMaker EMU. The gel is best filled into jars, treatment pump or tubes.

Properties

Intensive anti-wrinkle skin treatment with Argireline that can reduce face wrinkle depth and can decrease facial wrinkle formation. SkinTight AP is stimulating collagen synthesis and renewal of tissue and has instant skin tightening effects. Vitamin A Palmitate provides anti-wrinkle and regenerating properties while magnesium ascorbyl phosphate (MAP) acts as an anti-oxidant and improves skin elasticity. Apply the cream-gel twice a day for best results.
