#### Method

Give phase A into a disinfected glass beaker and stir until the EDTA is dissolved. Give phase B into another disinfected glass beaker and stir. Add then Phase B to phase A while stirring well until it becomes thick and uniform. Finally add Phase C one by one and stir again. If necessary adjust viscosity further with GelMaker EMU (shake well before use). This skin tightening gel can be stored in treatment pumps, jars or tubes.

#### Properties

SkinTight AP gives an immediate skin tightening and also long–term effect by protecting skin cells from oxidative stress and strengthening skin’s connective tissue. Coenzyme–Q10 is a potent antioxidant with effective anti–aging and, also like the jojoba protein, anti–wrinkle properties.
