

MakingCosmetics is a proud supporter of the UPS CarbonNeutral Program and contributes 1-5 cents for each package shipped to our customers.

The CarbonNeutral Company has verified the UPS shipment program and certified it to be CarbonNeutral®.

UPS offers customers the ability to counter balance the carbon dioxide emissions generated by the transport of their packages through carbon offsetting. This means that for every tonne of CO₂ a package produces in transportation, an equivalent amount of CO₂ is saved by a verified emission reduction project somewhere else in the world. By participating in the UPS carbon neutral program, customers will be supporting emissions reduction projects that help mitigate the climate impact of shipping their parcels.

CarbonNeutral® shipment

CarbonNeutral® shipment is a proprietary trademark of The CarbonNeutral Company and is a world-leading brand mark which guarantees the quality and credibility of the UPS carbon neutral shipment program. Permission to display the CarbonNeutral® mark is given to clients when CO₂ emissions have been measured and reduced to net zero through a program implemented in accordance with The CarbonNeutral Protocol. The Protocol assures the integrity of the carbon footprint assessments, the quality of the offsets purchased and the guarantee that the program has reduced emissions to net zero. The CarbonNeutral Protocol is overseen by a board of independent advisors to The CarbonNeutral Company. By using the CarbonNeutral® shipment accreditation, UPS is sending a powerful message about its commitment to taking responsible action to reduce its climate impact.

How the UPS carbon neutral shipment program works

Customers taking part in the UPS carbon neutral program pay a small incremental amount to offset the climate impact of the delivery of each of their packages.
