

ICE Conditioner

Specification Sheet

Description: Conditioning instant-cold-emulsion powder naturally derived from rapeseed (canola) oil, coconut oil & vegetable oils. Based on the primary lipids found on the hair surface. Hydrophile/lipophile balanced to ensure the highest viscosity & conditioning effect.

CAS: 36653-82-4, 17301-53-0, 61789-40-0, 1338-39-2

INCI Name: Cetyl alcohol, behentrimonium chloride, cocamidopropyl betaine, sorbitan laurate

Benefits:

- Able to form instant conditioning emulsions upon adding to water without heating
- Provides exceptional suspending and emulsification and leaves a soft, smooth feel on the skin and hair
- Excellent substantive conditioning, wet combing, anti-static properties, detangling, and hair softening.

Use: Add 5-10% to cold water and blend (stick blender) until smooth. Heating is sometimes beneficial. For external use only.

Applications: Creams, lotions, serums, conditioners.

Country of Origin: USA

Raw material source: Various vegetable oils

Manufacture: Blend of 4 compounds including conditioners, emulsifiers, and thickeners. Manufacturing process is described in more details in the individual product descriptions.

Animal Testing: Not animal tested

GMO: Not tested for GMOs

Vegan: Does not contain animal-derived components
