

Triglyceride Blend

Specification Sheet

Description: Specialty blend of triglycerides based on saturated even-numbered, unbranched natural fatty acids of vegetable origin. White to ivory-colored, semi-solid mass with a neutral fatty odor. Soluble in acetone and ethanol when heated; insoluble in water and miscible with fats and oils.

CAS: 208126-53-8

INCI Name: Caprylic/capric/myristic/stearic triglyceride

Benefits:

- Used as a non-oxidizing emollient or fat base particularly for processing in high-quality dermal preparations
- Does not leave a tacky feel or greasy shine on the skin like paraffins
- Spreads well on the skin and penetrates easily
- Does not inhibit natural skin respiration and has an absorption-promoting effect
- Free of skin-irritating substances such as heavy metals, catalysts, solvents antioxidants and other stabilizing additives

Use: Add to formulas to the oil phase either in molten or cold state. Typical use level 2 - 30%. For external use only.

Applications: Serums, creams & lotions, lip balms, face & hair masks.

Country of Origin: Germany

Raw material source: Vegetable origin

Manufacture: Extracted from saturated even-numbered, unbranched natural fatty acids of vegetable origin with a chain length of C8 - C18.

Animal Testing: Not animal tested

GMO: Not tested for GMOs

Vegan: Does not contain animal-derived components.
