

SkinWhite Ascutin

Specification Sheet

Description: Combination ingredient consisting of two different skin-whitening components for superior performance. Clear to slightly hazy liquid, light amber to medium brown, may sediment slightly over time. Preserved with benzyl alcohol, potassium sorbate, sodium benzoate, and sodium metabisulfite. Gluten-free and paraben-free. Water soluble.

CAS: 7732-18-5, 73049-73-7, 86404-04-8, 84390-01-8

INCI Name: Water, hydrolyzed oat protein, ethyl ascorbic acid, alpha-arbutin

Benefits:

- Inhibits melanin-production better than individual ingredients
- Contains calming oat oligopeptides and potent antioxidants
- Evens skin tone for a healthier complexion
- Visibly lightens skin in about four weeks
- Reduces dull appearance for brighter skin

Use: Use level 1-5%. Do not heat over 60°C/140°F. Can be added to finished products, stable in the pH-range of 4 to 7. External use only.

Applications: All kinds of skin lightening and anti-age spots formulas. Anti-aging products.

Country of Origin: USA

Raw material source: Oats, vitamin C and alpha-arbutin

Manufacture: Stabilized proprietary blend of two skin-whitening agents including vitamin C and alpha-arbutin. Alpha-arbutin is produced by reacting hydroquinone and dextrin (a sugar) with a glycosylating enzyme.

Animal Testing: Not animal tested

GMO: GMO-free but not certified

Vegan: Does not contain animal-derived components
