

Walnut Shell Powder

Specification Sheet

Description: Crushed walnut shell is a hard fibrous material ideal as an abrasive. Its grit is extremely durable, angular and multi-faceted, yet is considered a soft abrasive. Very fine particle size, passes through 40 mesh (sieve size of 0.42mm). Fine light-brown powder, characteristic odor. Insoluble in water.

CAS: 84012-43-1

INCI Name: *Juglans regia* (walnut)

Benefits:

- Soft but effective abrasive
- Natural, non-toxic, and biodegradable
- Reusable and compatible with anionic, non-ionic & cationic surfactants

Use: Can be added to formulas as is, typical final concentration 1-50%. For external use only.

Applications: Body scrubs, shower gels, peeling creams & lotions.

Country of Origin: USA
