**Method**

Combine phase A ingredients in a heat resistant glass jar, and mix well. Heat phase A to 60C/140F and stir occasionally to mix. Add phase B to phase A and stir. Remove from the heat and start filling the lip balm tubes. 50g/1.8oz make about 8-10 tubes. Micronized zinc oxide can also be replaced by regular zinc oxide, but will have a greater whitening effect.
