Phase C					
PhenylAroma Phenylpropanol, ethylhexyl glycerin	Anti-Microbial	0.70	0.70	0.02	0.14

Method

Combine phase A and heat to 160F/70C. Combine phase B and heat to the same temperature. Add phase B to phase A and blend well. Remove from the heat and start cooling under agitation. At 40C/100F add phase C. Blend well.

Properties

This all-natural lotion provides heavy-duty moisture to very dry skin. Can be an excellent overnight treatment or used in the winter to protect the skin from bitter cold and harsh artificial heat. Mango butter provides excellent nourishment with coconut oil, while our CreamMaker Green Coffee gives the cream a silky, moisturizing feel.
