### Method
No heating required. Phase A: Give phase A into a disinfected glass beaker and sprinkle the sorbitol into the distilled water while mixing well. Phase B: Add into another disinfected glass beaker and stir to blend the ingredients. Add phase B to phase A and stir very well until the cream-gel is smooth, thick and uniform (blend for a few minutes). Phase C: Add the ingredients of phase C to phase A/B and stir well. The gel can be filled into treatment pumps, jars or into tubes. If necessary, viscosity can further be adjusted with GelMaker EMU, blend well.

### Properties
Light cream-gel with Soy Rice Peptides & Ajurana Eye Contour that dramatically reduces dark circles and puffiness around the eyes (clinical study showed 35% reduction after 8 weeks treatment), improves skin smoothness and texture, improves microcirculation of the blood in the skin and reduces blue pigmentation.
