

Moisturizing & Cooling Tanning Spray - 1168

Ingredient	Function	Percent	Wgt (g)	Wgt (oz)	Vol (tsp.)
Phase A					
Distilled Water (aqua)		89.60	89.60	3.16	17.92
Glycerin (glycerin)		4.00	4.00	0.14	0.80
Dihydroxyacetone (1,3-dihydroxy-2-propanone)		3.00	3.00	0.11	0.60
Phase B					
Algae Extract & Hyaluronate Gel (water, glycerin, Laminaria Saccharina [Algae] extract, sodium hyaluronate)		2.00	2.00	0.07	0.40
Xanthan Gum, Prehydrated (xanthan gum)		0.20	0.20	0.01	0.04
Phase C					
Phenoxyethanol SA (phenoxyethanol, sorbic acid, caprylyl glycol)		0.80	0.80	0.03	0.16
Menthol Crystals (menthol)		0.10	0.10	0.00	0.02
Fragrance Lemon Verbena		0.30	0.30	0.01	0.06
Citric Acid (citric acid)	q.t.	null	null	null	null

Method

Add phase A into a disinfected glass beaker and stir well until dihydroxyacetone is dissolved. Add phase B to phase A and mix well with a stick blender. Add phase C to phase A/B, one by one, stirring well after each ingredient. Menthol crystals and fragrance can be adjusted to your liking. The intensity of tanning can be increased by adding a higher amount of dihydroxyacetone. Test the pH, ideal between 3.5-5 and adjust with citric acid if necessary.

Properties

Get these white legs tanned, without sunburn! Moisturizing liquid solution, quick and easy. Use a spray top on the bottle for easy application. Get a sun kissed look!
