Procedure

Phase A: Blend GelMaker Hydro with Sodium PCA. Then add to phase A. Mix well. Warm the water if necessary.

Phase B: Add to phase A and blend well until uniform. If needed Homogenize shortly.
pH 4.5

Properties

Bringing strength and moisture to hair, making it healthier and stronger. Hydroxypropyl guar and pvp help with curl retention and maintaining curls. It allows the hair to resist humidity and to keep the length and interval of each curl to provide beautiful curly hair in all situations. Caramel can add a light tan to blonde hair.
