**Method**

Add phase A into a disinfected glass beaker and mix well to dissolve the gum, use a sheer mixer or homogenizer if necessary. Add phase B one by one while stirring gently. Add phase C to phase A/B and blend on low. Adjust pH to 4.5-6 with citric acid.

**Properties**

Gentle ingredients for a clear skin. Sea Fennel and Henna Extracts may help with blemishes, redness and adding a toning touch. An ultra fine selected pumice helps slowly shed dead skin cells, with regular use. Use a disc cap or a lotion pump as the pumice may clog a treatment pump.
