### Procedure

No heating required. Dissolve the sodium gluconate in the water. Sprinkle the gelmaker powder into the water mixture, let hydrate. Blend well with a stick blender or homogenize if. Add phase B and blend well until uniform. Add phase C and blend shortly, until uniform.

### Properties

Simple pleasant non-oily cream froth that is light, absorbs quickly and is highly moisturizing. Phospholipid Jojoba Milk is a concentrated emulsion containing micro-droplets of jojoba oil and phospholipids. It can be used in many different formulations to enhance an existing product or to produce a quick emulsion like above. Perfect for the beginner as there are few ingredients and no heating required.
