PEG-7 Glyceryl Cocoate	PEG-7 Glyceryl Cocoate	Emulsifier	0.50	0.50	0.02
TEA	Triethanolamine	pH Adjuster	0.05	0.05	0.00

Procedure

Phase A: Combine and blend gently.

Phase B: Pre-mix GelMaker® Hydro with Glycerin and add to phase A. Use sheer mixing to fully hydrate. Add remaining ingredients to phase A, one at the time, under good agitation.

Test pH and adjust to pH 4.0 if needed.

Tip: BHA and TEA can be excluded for a moisturizing herbal toner minus the exfoliating part.

Additional information: Salicylic acid (BHA) is know to exfoliate the skin and clear imperfections.

This active ingredient is an OTC ingredient and regulated by the FDA. This is a starter formulation, if you plan to market an OTC product, your facility must be registered with the FDA and proper product testing must be performed.

Properties

Moisturizing and slightly exfoliating toner with botanicals that have anti-oxidant, soothing and toning properties. May help with oily and blemished skin.
