Procedure

Phase A: Combine and blend well until GelMaker® HYDRO is well hydrated. Heat to 70C.

Phase B: Combine ingredients and heat to 70C.

Slowly add phase B to phase A, using a propeller stirrer. Remove from the heat. Cool to 40C under stirring (300-500rpm)

Phase C: Add ingredients one by one under good stirring. Cool all the way.

pH: 5.9

Stable at 6months.

Properties

Indulge in our premium hand cream, infused with valuable amla and marula oils and moisture-retaining murumuru butter, offering a smooth balmy sensation that won't feel heavy or greasy.
