Provitamin B5	Panthenol	Vitamin	0.50	0.50	0.02
Fragrance Coral Reef	Fragrance	Fragrance	0.20	0.20	0.01

Procedure

Phase A: Measure and add ingredients to the mixing vessel.

Phase B: Add to a second mixing vessel but Pre-mix the Hydroxypropyl Methylcellulose with the Glycerin first, then blend with remaining ingredients in the vessel.

Heat both phases to 75C/170F until ingredients are melted.

Add phase B to phase A under good stirring (propeller stirring at 500rpm), blend for 10-15min. Begin cooling.

Phase C: Add ingredients at 40C/100F and blend well.

pH 5.8

Properties

Thick cream with natural lubricity that improves razor glide, enhances the lather and leaves a softened after feel. Has good slip and leaves skin soft, contains HerbaMaker™ SOOTH and Coconut, that may help calming the skin. Use a decent amount and apply to damp skin for best results.
