

1583 - Opalescent Highlighter (50.00g)

Ingredient	Function	Percent	Wgt (g)	Wgt (oz)	Vol (tsp.)
Phase A					
Natural Cream Eye Shadow Base lauryl laurate, caprylic/capric triglyceride, polyhydroxystearic acid, isododecane, trimethylsiloxysilicate resin, candelilla wax, octyldodecanol, titanium dioxide, talc, sunflower wax, silica, dimethicone, tocopherol.	Base	82.70	41.35	1.46	8.27
Mica Interference Violet (mica [CI 77019], titanium dioxide [CI 77891], silica)	Colorant	12.20	6.10	0.22	1.22
Mica Interference Green (mica [CI 77019], titanium dioxide [CI 77891], silica)	Colorant	3.00	1.50	0.05	0.30
Mica Beige (mica [CI 77019], titanium dioxide [CI 77891], iron oxide [CI 77491])	Colorant	2.00	1.00	0.04	0.20
Iron Oxide Brown, Liquid (CI 77492 [iron oxides], castor oil)	Colorant	0.10	0.05	0.00	0.01

Method

Combine phase A ingredients in a heat-resistant beaker, stir well until melted and pour into containers. Do not homogenize or blend with any high-speed mixer as this will damage mica particles and reduce sparkle.

Properties

This highlighter flashes beautiful shades of violet and emerald, giving your make-up a unique twist. For deeper skintones, the amount of iron oxide brown can be increased. For a strong, glittery look you can incorporate our Diamond Sparkle Mica!
