Procedure

(Only the distilled water needs to be heated). Mix phase A (except the ICE Silicone) and heat slightly to 125F/51C. Sprinkle the ICE Silicone into the solution and mix well (homogenizer or stick blender). Add phase B to phase A and blend again well. Add glycerin last and blend well until free of lumps. The cream is softer now after adding phase B. Mix well so any residues from the ICE Silicone are dispersed. Add phase C to phase A/B and blend again well. Thickness can be adjusted with ICE Silicone if needed. Test the pH. Adjust to pH 5.5-6.5, by adding triethanolamine. This formulation needs a pH above 5.5.

Properties

Soft Cream Gel with one of the number one anti-aging ingredients "niacinamide" for an anti-aging effect on many levels. Niacinamide has been found to have soothing activity which may be useful for blemished skin. Can improve the appearance of aged, hyperpigmented and photodamaged skin. Has been found to reduce appearance of wrinkles and fine lines. Skintight C-root together with green tea extract & licorice will help this sleeping mask have anti-oxidizing, nourishing, lightening & tightening properties and will help replenish the skin during the night.
