Fragrance	Fragrance	Fragrance (optional)	0.20	0.20	0.01

Procedure

1. Weigh phase A and Phase B ingredients in different beakers.
 2. Heat both phases to 70-75 degrees celsius.
 3. Add phase B to phase A and blend well using a propeller stirrer or blending by hand. Remove from the heat and homogenize shortly, cool to 40 degrees C., and continue to blend at low rpm.
 4. Add Phase C and blend with the stirrer until the extracts and preservative are fully integrated.
 5. Add fragrance (optional) and blend well.
 6. Package into jars.
- pH: 5.5

Properties

Soothing skin cream for the thirsty and dry skin that needs extra care. Oils, butters, emulsifiers and selected botanicals help in tackling extreme dry skin condition and help alleviate problems with dry skin.
