**Method**

Add phase A into a disinfected, heat-resistant glass beaker and heat it to 140oF/60oC to melt the ingredients. Add phase B into a separate beaker and mix well to dissolve the gum, heat to the same temperature. Add phase B to A while stirring continuously. Stir shortly with high speed, then after the temperature has cooled to 100F/38oC stir again on high. Add phase C to the cream and stir again. The cream can be filled into jars, treatment pumps or tubes.

**Properties**

Night treatment that nourishes intensively, gives the skin new elasticity and promotes cell renewal. Rich w/o emulsion with precious emollients that form a caring film on the skin. For dry skin types.
