### Procedure

Phase A: Combine in a heat-resistant glass beaker, heat to 75C.

Phase B: Pre-mix GelMaker Hydro and blend well until hydrated and free from lumps. Heat to 75C

Add phase B to phase A with constant stirring (propeller mixer). Homogenize for a short time. Cool to 40C.

Phase C: Pre-mix then add to phase A/B. Blend well.

Phase D: Add to batch, and blend well. Use a homogenizer for an extra smooth texture.

### Properties

Hydrating moisturizer infused with nourishing vitamins such as vitamin b3, vitamin a and additionally enriched with different molecular weight hyaluronic acid. Silky feel leaving the skin looking supple and happy.
