# ABOUT US

MakingCosmetics Inc. was founded in 1997 and we specialize in ingredients for making makeup, conditioner, lotion and other personal care products and color cosmetics. We are proud to be one of the very first companies in the United States that has established itself as a leading retail supplier of cosmetic ingredients for businesses and individuals.

We are a FDA-registered, ISO certified, and OTC-licensed cGMP/FDA ingredient supplier. We offer a wide range of cosmetic and makeup ingredients, raw materials, and tools for manufacturing personal care products, and color cosmetics.

We are committed to providing you as many raw materials as possible derived from truly natural, GMO-free, and sustainable sources allowing you to create pure natural products that are commercially not available.

## CHARACTERISTICS OF EMOLLIENTS

Emollients include a large variety of compounds with softening and smoothing properties. As compared to plant oils, specialty emollients are resistant to oxidation and can do not spoil and don't need antioxidants for preservation.

Additionally, most specialty emollients have great spreadability on the skin and provide a satiny, smooth and non-greasy feel to the skin. Typically, they are non-comedogenic, non-allergic, and non-irritant.

## Avocado Butter

BUT-AVCO-01

Natural avocado seed oil extracted from the flesh of the avocado fruit, combined with soybean lipids and beeswax to form a creamy texture.

**CAS:** 8024-32-6, 8012-89-3

**INCI Name:** Persea Gratissima (avocado) oil, glycine soja (soybean) lipids, beeswax

**Benefits:**

- High-quality emollient and moisturizer
- Natural antioxidant properties
- Has soothing and anti-irritant properties

**Applications:** Creams, lotions, pomades, lip balms, lipsticks, protective creams, hair pomades, makeup products, conditioners.

Prices starting at \$6.90

## Cocoa Butter Deodorized, USDA Certified Organic

BUT-CACO-01

Organic, natural fat from the seeds of the fruit of the Cacao tree. Rich in oleic, stearic & palmitic fatty acids, also contains flavors (e.g. vanillic acid), sterols, tannins & pigments.

**INCI Name:** Organic Theobroma cacao (Cocoa butter)

**Benefits:**

- High-quality skin softener, emollient and conditioner
- Excellent water binding ability (prevents moisture loss)
- Used as film forming agent, non-gelling thickener, and moisturizer
- Effective emulsion stabilizer

**Applications:** Creams, lotions, pomades, balms, protective creams, ointments, makeup products, conditioners, and makeup products.

Prices starting at \$7.00

## Cocoa Butter Wafers Deodorized USDA Certified Organic

BUT-CACO-02

Organic, natural fat from the seeds of the fruit of the Cacao tree. Rich in oleic, stearic & palmitic fatty acids, contains flavors (e.g. vanillic acid), sterols, tannins and pigments.

**CAS:** 8002-31-2

**INCI Name:** Organic Theobroma cacao (Cocoa butter)

**Benefits:**

- High-quality skin softener, emollient, and conditioner
- Used as film forming agent, non-gelling thickener, and moisturizer
- Effective emulsion stabilizer

**Applications:** Creams, lotions, pomades, balms, protective creams, ointments, makeup products, conditioners.

Prices starting at \$7.50

## Green Tea Butter

BUT-GRTEA-01

Hydrogenated vegetable oils blended with finely ground matcha green tea leaves resulting in a buttery soft consistency.

**CAS:** 8007-69-0, 84650-60-2

**INCI Name:** Prunus Amygdalus Dulcis (Sweet Almond) oil, hydrogenated vegetable oil, Camellia Sinensis leaf powder

### Benefits:

- Rich in polyphenols, epigallocatechin gallate and xanthines (caffeine and theobromine)
- Antioxidant properties
- Natural anti-irritant and moisturizing agent

**Applications:** Lotions, creams, butters, sun care & after sun products (1-10%), hair care (1-5%), ointments and balms 4-100%.

Prices starting at \$5.40

## Mango Butter

BUT-MANGO-02

Butter obtained from the kernels of mango fruits (*Mangifera Indica*). It's refined, bleached and deodorized to obtain a product which meets the requirements for cosmetic applications.

**CAS:** 90063-86-8

**INCI Name:** *Mangifera Indica* (Mango) seed butter

### Benefits:

- Highly effective emollient and skin nutrient due to its unique softening properties and the high level of non-saponifiables
- Ideal for dry, damaged and aging skin

**Applications:** Skin creams, hair masks, mature skin products, lip care, body butters.

Prices starting at \$6.10

## Murumuru Butter

BUT-MURU-01

Murumuru butter is the fatty part collected from the seeds of the Murumuru palm tree, native in Brazil.

**CAS:** 356065-49-1

**INCI Name:** *Astrocaryum Murumuru* (murumuru) butter

### Benefits:

- Effective emollient with great moisturizing properties
- No tacky or greasy feel on the skin.
- Useful in hair formulas due to its glossy appearance
- Easily spreadable. Will melt on contact with skin.
- Non-comedogenic

**Applications:** Lotions, creams, hair care products, sun care & after sun products, lip balms, body butter, ointments.

Prices starting at \$12.30

## Orange Peel Butter

BUT-ORAN-01

Contains orange peel oil and orange peel wax with almond oil and vegetable oils.

**CAS:** 8007-69-0, 8008-57-9

**INCI Name:** Prunus amygdalus dulcis (sweet almond) oil, Citrus aurantium dulcis (orange) peel oil, citrus aurantium dulcis (orange) peel wax, hydrogenated vegetable oil

**Benefits:**

- Shown to have moisturizing, antioxidant, soothing and anti-irritant properties
- Very fragrant butter with scent of orange peel

**Applications:** Lotions, creams, sun care & after sun products, moisturizers, body butter and hair care, ointments.

Prices starting at \$12.00

## Shea Butter Glycerides

BUT-SHEAGLYC-01

Emollient and self-emulsifying agent that is completely water-dispersible thereby maintaining all the properties of a natural butter.

Composed of the glycerides of vegetable fat extracted from the fruit of the Shea tree.

**CAS:** 97488-91-0

**INCI Name:** Butyrospermum parkii (shea) butter

**Benefits:**

- Absorbs rapidly without leaving a greasy feel
- Effectively conditions hair
- Can be used as a viscosity modifier, opacifier, dispersing agent, or fragrance fixative
- Compatible with surfactant based systems

**Applications:** Body washes, hair shampoos/conditioners, body butters, lotions, creams, ointments, sunscreen products, and massage creams.

Prices starting at \$13.90

## Shea Butter, USDA Certified Organic

BUT-SHEA-01

Plant fat of the nuts of the African Karite tree (ambuk butter).

**CAS:** 91080-23-8

**INCI Name:** Organic Butyrospermum parkii (shea) butter

**Benefits:**

- Contains allantoin, vitamin A and E, and various cinnamic
- Potent moisturizer and emollient providing effective skin protection against environmental stress factors
- Has anti-irritant and soothing properties and improves the appearance of aging skin

**Applications:** Lotions, creams, sun care & after sun products, facial moisturizers, body butter, and ointments.

Prices starting at \$6.00

## Abyssinian Oil OIL-ABYSSN-01

Abyssinian oil is refined and expeller-pressed from the seeds of the crambe abyssinica plant. Due to its molecular structure and high concentration of unsaturated fatty acids, abyssinian oil is highly resistant to oxidation

**CAS:** 68956-68-3

**INCI Name:** Crambe Abyssinica (Abyssinian) oil

**Benefits:**

- Non-greasy feel, absorbs almost instantly and leaves behind a soft moisture barrier
- Creates a net-like structure around the hair
- Has good moisturizing and water-retaining properties

**Applications:** Hair care products, creams, lotions, makeup, face oils, color cosmetics, skin treatments, hand creams.

Prices starting at \$9.90

## Almond Oil OIL-ALMD-01

Natural oil pressed from the seeds of the sweet almond tree, contains 62-86% oleic acid, 20-30% linoleic acid & other valuable fatty acids, rich in beta-sitosterol, squalene & vitamin E.

**CAS:** 8007-69-0

**INCI Name:** Prunus amygdalus dulcis (almond) oil

**Benefits:**

- Effective emollient
- Good nourishing and revitalizing effect
- Penetrates and moisturizes the skin very well
- Ideal for irritated and blemished skin

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$5.00

## Almond Oil, USDA Certified Organic OIL-ALMD-02

Organic oil pressed from the seeds of the sweet almond tree, contains 62-86% oleic acid, 20-30% linoleic acid & other valuable fatty acids, rich in beta-sitosterol, squalene and vitamin E.

**CAS:** 8007-69-0

**INCI Name:** Organic Prunus amygdalus dulcis (almond) oil

**Benefits:**

- Effective emollient
- Good nourishing and revitalizing effect
- Penetrates and moisturizes the skin very well
- Ideal for irritated and blemished skin

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$11.20

## Amla Oil, USDA Certified Organic OIL-AMLA-01

Known also as Indian gooseberry oil, amla oil is cold-pressed extracted from the seed of the *Emblica officinalis* plant. Unrefined. Rich in antioxidants including flavonoids and polyphenols.

**CAS:** 90028-28-7

**INCI Name:** *Emblica officinalis* (Amla) oil

**Benefits:**

- Used in anti-aging products due to its antioxidant properties
- Helps nourish hair and moisturize the scalp.
- Absorbs well into skin
- Has good moisturizing and water-retaining properties

**Applications:** Hair care products, creams, lotions, makeup, face oils, color cosmetics, skin treatments, hand creams.

Prices starting at \$13.50

## Apricot Kernel Oil OIL-APRIC-01

Light carrier oil made from the dried kernels of apricots. Has similar properties as almond oil. 100% pure. Rich in vitamin A & E and oleic & linoleic fatty acids.

**CAS:** 72869-69-3

**INCI Name:** *Prunus Armeniaca* (Apricot) kernel oil

**Benefits:**

- Excellent carrier oil for all kinds of skin care products and color cosmetics
- Has good moisturizing and water-retaining properties

**Applications:** Creams, lotions, makeup, face oils, color cosmetics, conditioners, skin treatments, hand creams.

Prices starting at \$8.30

## Argan Oil, USDA Certified Organic OIL-ARGA-01

Natural oil obtained from *Argania spinosa* (L.), an endemic tree of southwest Morocco, 100% pure, virgin and cold pressed. High content of unsaturated fatty acids, natural tocopherols (vitamin E).

**CAS:** 223747-87-3

**INCI Name:** Organic *Argania Spinosa* (Argan) kernel oil

**Benefits:**

- Valuable natural emollient with excellent nutritional benefits for skin and hair
- Has high content of unsaturated fatty acids, phenols and carotenes

**Applications:** Creams, serums, lotions, hair care products, sun care, lip care products.

Prices starting at \$16.40

## Avocado Oil OIL-AVOC-01

Natural, 100% virgin avocado oil, refined & expeller pressed. Penetrates skin easily and moisturizes well.

**CAS:** 8024-32-6

**INCI Name:** Persea Gratissima (avocado) oil

### Benefits:

- Nourishing oil for skin and hair care
- Particularly high content of vitamins A, B, D and E, and essential fatty acids
- Moisturizes and softens skin and hair
- Well suited for dry skin, dry hair and damaged hair

**Applications:** Creams, serums, lotions, hair care products, sun care, lip care products.

Prices starting at \$6.10

## Baobab Oil, USDA Certified Organic OIL-BAOB-02

Organic Baobab Oil is from the large Baobab fruits produced by the Adansonia digitata trees native to Africa. Also called the "super fruit" due to its richness in omega-3, antioxidants & vitamin A, D and C.

**CAS:** 225233-93

**INCI Name:** Organic Adansonia Digitata (Baobab) oil

### Benefits:

- Rich, premium emollient for skin and hair care use due to its content of vitamins and omega fatty acids
- Helps soothe dry and itchy skin

**Applications:** Lotions & creams, face oils, massage oils, products for dry skin & hair conditioners.

Prices starting at \$16.40

## Camelina Oil OIL-CAML-01

Natural 100% virgin camelina oil. Unrefined and not deodorized. Mild oil that contains over 50% polyunsaturated fatty acids.

**CAS:** 68956-68-3

**INCI Name:** Camelina sativa seed (Camelina) oil

### Benefits:

- Very nourishing plant oil with natural vitamin E
- Helps keep the skin elastic, moisturized, and protected
- Great ingredient to add nourishing properties for skin and hair products

**Applications:** Moisturizing creams & lotions, silicone emulsions, deodorants, various hair care products.

Prices starting at \$7.10

## Carrot Oil & Beta-Carotene

### OIL-CARROT-01

Blend of sunflower seed oil, carrot seed oil, and carrot extract enriched with beta-carotene and vitamin C. Beta-carotene effectively prevents and controls the production of free radicals and reduces free radical reactions.

**CAS:** 7732-18-5, 56-81-5, 223751-76-6, 39300-88-4, 532-32-1, 24634-61-5

**INCI Name:** Helianthus Annuus seed oil, Daucus Carota Sativa root extract, Daucus Carota Sativa seed oil, beta-carotene, ascorbyl palmitate

#### Benefits:

- Provides excellent emollient properties
- Both carrot and sunflower oil contain fatty acids
- Suitable to be formulated in any kind of skin or hair product

**Applications:** Creams and lotions, serums, face oils, hair care products.

Prices starting at \$16.40

## Castor Oil

### OIL-CAST-01

Natural vegetable oil derived from the seeds of the herbaceous plant castor, consisting of triglycerides of different fatty acids.

**CAS:** 8001-79-4

**INCI Name:** Ricinus communis (Castor) oil

#### Benefits:

- Excellent emollient leaving the skin soft and smooth
- Nourishes hair - making it look healthy
- Widely used as a moisturizer and lubricant in lip care products to add shine and luster

**Applications:** Creams, lotions, hair care products, sun care, lip care products.

Prices starting at \$4.40

## Citronella Oil (Special Order Item)

### OIL-CITRONEL-01

Citronella oil is obtained by the steam distillation of the freshly cut or partially dried grasses of Cymbopogon winterianus (Lemongrass).

**CAS:** 8000-29-1

**INCI Name:** Cymbopogon Winterianus (citronella) oil

#### Benefits:

- Widely used in aromatherapy and as insect repellent
- Provides a typical citrus note in fragrances
- Has some anti-microbial effects and can be used in cleansing products

**Applications:** Insect repellent, creams, lotions, ointments, bath oils, soaps, cleansers.

Prices starting at \$194.00

## Coconut Oil OIL-COCO-01

Natural whole coconut oil, not fractionated, obtained by expression from the kernels of the seeds of *Cocos nucifera*.

**CAS:** 8001-31-8

**INCI Name:** *Cocos nucifera* (Coconut) oil

**Benefits:**

- Precious emollient leaving the skin and hair soft, smooth and conditioned
- Lubricant for massage oils

**Applications:** Creams, lotions, soaps, shampoos, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$5.90

## Coconut Oil, USDA Certified Organic OIL-COCO-02

Extra virgin (unrefined), cold-pressed USDA certified organic coconut oil is extracted from the meat of the coconut.

**CAS:** 8001-31-8

**INCI Name:** Organic *Cocos nucifera* (Coconut) oil

**Benefits:**

- Precious emollient leaving the skin and hair soft, smooth and conditioned
- Lubricant for massage oils
- Highly resistant to rancidity

**Applications:** Creams, lotions, soaps, shampoos, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$7.30

## Cranberry Seed Oil OIL-CRNBE-01

Natural oil pressed from the seeds of cranberries. Cold pressed, unrefined and cold filtered. Insoluble in water, hardly soluble in alcohol.

**CAS:** 68956-68-6

**INCI Name:** *Vaccinium Macrocarpon* (Cranberry) Seed Oil

**Benefits:**

- Unique oil due to its balanced content of omega-3, 6, and 9
- Rich in vitamin A, tocopherols, tocotrienols, and more
- Natural emollient - soft and moisturizing feel
- Has antioxidant & nourishing properties

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$17.40

## Grape Seed Oil

OIL-GRAP-01

Natural oil pressed from the seeds of grapes (cold pressed), contains 60-76% linoleic acid, 12-25% oleic acid, 6-9% palmitic acid and 3-6% stearic acid, rich in various vitamins including vitamin A, D and E.

**CAS:** 8024-22-4

**INCI Name:** Vitus vinifera (Grape) seed oil

### Benefits:

- Effective, non-greasy emollient with good skin absorption
- Leaves the skin soft, smooth and conditioned
- Has a mild toning effect
- Used in applications for blemished, oily, and impure skin

**Applications:** Creams, lotions, creams for impure skin, skin toners, bath & massage oils, anti-aging products, hair care products, makeup products.

Prices starting at \$5.20

## Hemp Seed Oil

OIL-HEMP-01

Natural oil pressed from the seeds of the hemp plant. Cold pressed, unrefined, and filtered.

**CAS:** 68956-68-3

**INCI Name:** Cannabis Sativa (Hemp) seed oil

### Benefits:

- Effective emollient and nourishing ingredient
- Gives a rich skin feel
- Is beneficial for irritated and dry skin

**Applications:** Creams, lotions, makeup & sun care products, ointments, bath oils, personal & baby care products.

Prices starting at \$5.40

## Jojoba Oil, USDA Certified Organic

OIL-JOJO-02

Organic pure liquid wax derived from the seeds of a plant growing in the Sonora desert in the USA, composed of different liquid wax esters similar to human sebaceous, based on fatty acids & fatty alcohols, cold-pressed, insoluble in water.

**CAS:** 61789-91-1

**INCI Name:** Organic Simmondsia Chinensis (Jojoba) seed oil

### Benefits:

- Precious moisturizer and emollient
- Prevents transdermal water loss and retains moisture
- Good lubricant without leaving a greasy film
- Regular application can reduce the appearance of wrinkles

**Applications:** Lotions, creams, nourishing skin & hair care products, body washes, shampoos, baby products, and more.

Prices starting at \$11.40

## Macadamia Nut Oil

OIL-MACA-01

Natural oil pressed from the nut meat of the macadamia tree (*macadamia ternifolia*), contains 60% oleic acid, 18% palmitoleic acid, 2.7% linoleic acid, 3% omega-3 and omega-6.

**CAS:** 129811-19-4

**INCI Name:** Macadamia Integrifolia oil

### Benefits:

- Effective emollient and fragrance fixative
- Gives a rich skin feel and is especially suited for heavy creams and sun care products

**Applications:** Creams, lotions, makeup & sun care products, ointments, bath oils, personal & baby care products.

Prices starting at \$6.10

## Meadowfoam Seed Oil

OIL-MDFS-02

Vegetable derived lipids & sterols from meadowfoam seed oil (*limnanthes alba*).

**CAS:** 153065-40-8

**INCI Name:** Limnanthes Alba (Meadowfoam) seed oil

### Benefits:

- Excellent moisturizer in emulsion-based products
- Extremely high oxidative stability making it one of the most stable plant oils
- Gives non-greasy feel
- Good pigment wetting properties in color cosmetics

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care

Prices starting at \$11.40

## Oat Emollient

OIL-OATEMOL-01

Natural oily lipid complex cold-pressed from oat kernels.

**CAS:** 84012-26-0

**INCI Name:** Avena Sativa (Oat) kernel oil

### Benefits:

- Outstanding skin absorbency
- Non-comedogenic oil
- Acts as an occlusive and a humectant
- Approved by Ecocert in accordance with COSMOS standard
- Hypoallergenic, free from allergens

**Applications:** Creams, lotions, ointments, bath oils, hair care & sun care products, baby care products.

Prices starting at \$14.90

## Red Raspberry Seed Oil

OIL-RASPS-01

Excellent light, natural oil from the kernels of red raspberries. Cold-pressed which optimizes the phytochemical content. This variety of red raspberry has the highest ellagitannin content of all red raspberry cultivars.

**CAS:** 381718-28-1

**INCI Name:** Rubus idaeus (raspberry) seed oil

### Benefits:

- Effective emollient leaving the skin soft and smooth
- Good nourishing and revitalizing effect
- Has moisturizing and water-retaining properties
- Very stable against auto-oxidation

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$19.50

## Repair VITA Oil

OIL-REPVITA-01

Nourishing blend of special selected oils combined with three different plant extracts.

**CAS:** 8001-21-6, 438545-25-6, 8001-31-8, 10191-41-0, 84604-14-8

**INCI Name:** Helianthus Annuus (sunflower) seed oil, Macadamia

Ternifolia seed oil, Chenopodium Quinoa seed extract, Cocos Nucifera (coconut) oil, Gardenia Taitensis flower extract, tocopherol, Rosmarinus Officinalis (rosemary) leaf extract

### Benefits:

- Moisturizes and repairs stressed and damaged hair
- Revitalizes tired and sagging skin
- Provides effective antioxidant protection
- Very rich in mono-unsaturated fatty acids and vitamins E, B1 and B2

**Applications:** Hair conditioning, hair masks, hair fluids, anti-hair loss, skin barrier repair, and more.

Prices starting at \$12.90

## Rose Hip Oil

OIL-ROHP-01

Natural oil extracted from the seeds of the rose hip or wildrose. High in linoleic & linolenic essential fatty acids which are key components of epidermal skin cells. Expeller-pressed, refined.

**CAS:** 84603-93-0

**INCI Name:** Rosa Canina (Rose hip) seed oil

### Benefits:

- Premium emollient and moisturizer
- Has been shown to improve the appearance of aging skin
- Ideal for distressed and/or sensitive skin

**Applications:** Creams, lotions, protecting creams, ointments, bath oils, makeup & sun care products, personal & baby care products.

Prices starting at \$17.70

## Sesame Seed Oil, USDA Certified Organic OIL-SESA-01

Organic, unrefined sesame seed oil (*sesamum indicum*) is a very stable oil with a long shelf life.

**CAS:** 8008-74-0

**INCI Name:** Organic Sesamum Indicum (Sesame) seed oil.

### Benefits:

- Excellent emollient, good nourishing, and moisturizing properties
- Great carrier oil for various formulations
- Ideal for blemished and impure skin
- One of the most versatile oils for cosmetics due to its lightness, and odorless and nourishing properties

**Applications:** Creams, lotions, toners, bath & massage oils, anti-aging products, hair care products, makeup products.

Prices starting at \$7.90

## Squalane ELL-SQUAL-01

100% plant-based emollient derived from plant sugars  
Squalane occurs naturally in the lipidic layers of the skin and prevents moisture loss while restoring the skin's suppleness and flexibility.

**CAS:** 111-01-3

**INCI Name:** Squalane

### Benefits:

- Highly moisturizing emollient that has high resistance to oxidation and high affinity to skin and its natural lipids
- Excellent skin-penetrating qualities
- Medium spreading qualities
- Non irritating, non- allergenic, hypo-comedogenic

**Applications:** Skin creams, lotions, hair care, massage oils, makeup products and lip care

Prices starting at \$16.40

## Squalane Light ELL-SQUAL-02

Non-volatile, non-polar plant-derived C15-hydrocarbon oil that is a perfect alternative for petroleum-based paraffins and silicone ingredients.

**CAS:** 3891-98-3 (or also 64741-76-0)

**INCI Name:** Hydrogenated farnesene (or C13-15 alkane)

### Benefits:

- NPA certified (The Natural Seal)
- Creates elegant and light textures with a non-tacky, non-greasy and silky finish
- High spreadability
- Can be used as dispersing agent for crystalline UV filters
- Facilitates a smooth and even application for makeup

**Applications:** All kinds of skin care products, hair conditioners, lip balms, lip sticks, makeup.

Prices starting at \$6.80

## Sunflower Oil, USDA Certified Organic OIL-SUNFL-01

Organic pure natural oil derived from the seeds of sunflowers. High oleic form as it contains a high amount of oleic acids, which make the oil more stable and resistant to oxidation.

**CAS:** 8001-21-6

**INCI Name:** Organic Helianthus Annuus (Sunflower Seed) Oil

**Benefits:**

- Effective humectant, nutrient, and emollient for the skin
- Nourishes and softens skin and hair
- Very good lubricant

**Applications:** Lotions, creams, nourishing skin and hair care products, body washes, shampoos, baby products, sun care and after sun products, bath oils, lip care products.

Prices starting at \$6.80

# Silicones

## Amodimethicone ELL-AMDI-01

Milky, white silicone emulsion offering excellent conditioning and softening properties.

**CAS:** 68554-54-1, 24938-91-5, 112-02-7

**INCI Name:** Amodimethicone, trideceth-12, cetrimonium chloride

**Benefits:**

- Water soluble silicone emulsion for use in hair conditioners, hair spritzes, and styling products
- Protects the hair shaft, moisturizes hair, gives softness, and shine
- Adds a silky feel to skin care creams and reduces greasiness

**Applications:** Hair and skin conditioning products such as shampoos, conditioners, creams, and lotions.

Prices starting at \$9.90

## Cyclomethicone ELL-CYCLM-01

100% active cyclic silicone blend consisting of siloxane D4 and siloxane D5. Cyclic silicones are low-molecular weight silicones and are not viscous but very fluid and often used as solvents.

**CAS:** 556-67-2, 541-02-6

**INCI Name:** Cyclotetrasiloxane, cyclopentasiloxane

**Benefits:**

- Rapidly evaporates without cooling the skin
- Ideal carrier for makeup, and other color cosmetic creams, deodorants and skin products without oily feel
- Is beneficial for irritated and dry skin

**Applications:** Creams, lotions, makeup & sun care products, ointments, bath oils, personal & baby care products.

Prices starting at \$10.10

## Dimethicone 500

ELL-DIMT-01

100% active linear silicone polymer with a viscosity of 500 cps. Linear silicones are large high-molecular polymers and usually are viscous and more oil-like.

**CAS:** 9006-65-9

**INCI Name:** Dimethicone

### Benefits:

- Used for its chemical stability in anti-foams, color cosmetics, and hair care products
- Removes whitening of creams when rubbed into skin.
- Improves wet and dry combing
- Makes colors more dispersible

**Applications:** Hair & skin conditioning products as shampoos, conditioners, creams, lotions, but also color cosmetics. Skin protectant products.

Prices starting at \$8.10

## Dimethicone Fluid

ELL-DIMT-02

100% active linear silicone polymer with a viscosity of 10 cps. Usually, linear silicones are large high-molecular polymers and are viscous, more oil-like, whereas this special dimethicone is a non-viscous form.

**CAS:** 63148-62-9

**INCI Name:** Dimethicone

### Benefits:

- Used for its low viscosity in various liquids
- Will take out the whitening of creams
- Improves wet and dry combing and gives a silky gloss to the hair
- Makes colors more dispersible

**Applications:** Hair & skin conditioning products as shampoos, conditioners, creams, lotions, but also color cosmetics. Skin protectant products.

Prices starting at \$12.90

## Dimethicone Satin

ELL-DIMSAT-01

Mixture of low and high molecular weight linear silicones. Linear silicones are large polymers (polydimethylsiloxanes) and usually are viscous and more oil-like.

**CAS:** 9006-65-9

**INCI Name:** Dimethicone

### Benefits:

- Provides more cushion, greater slip, with a satiny after-feel
- Takes out tackiness of products and is greatly moisturizing
- Provides luxurious skin feels for creams and lotions

**Applications:** Creams, lotions, hair care products, shower gels, sun care, makeup, massage treatments.

Prices starting at \$11.40

## Iso-Dimethicone Copolymer ELL-ISDICO-01

Non-crosslinked, non-alkyl containing silicone polymer blended with the hydrocarbon emollient isododecane.

**CAS:** 141-70-5, 13475-82-6, 156065-02-0

**INCI Name:** Isododecane, Bis vinyl dimethicone/dimethicone copolymer

**Benefits:**

- Reduces tackiness and greasiness of skin care products
- Gives matte and powdered after-feel to the skin
- Designed to enhance the texture, gloss and film integrity of formulations
- Provides fast drying, very light spreading and silky feel to emulsions and anhydrous products

**Applications:** Color cosmetics, skin & hair care, serums, lotions & creams.

Prices starting at \$23.90

## PEG-8 Dimethicone ELL-PEG8DI-01

Dimethicone is a water soluble nonionic dimethicone copolyol. Clear liquid, HLB 10, molecular weight 5500.

**CAS:** 68937-54-2

**INCI Name:** PEG-8 dimethicone

**Benefits:**

- Improves skin feel
- Detackifies ingredients in formulas
- Adds additional moisturization to surfactant systems
- Adds slip to carbomer based formulas

**Applications:** Creams, lotions, hair care products, shower gels, sun care, makeup.

Prices starting at \$19.15

## Polymethylsilsequioxane ELL-POLYMETSILSESQ-01

High-performing spherical silicone powder providing enhanced aesthetics and wrinkle-masking effects. It creates a non-thickening effect, is water-repellent, and flows freely without agglomeration, providing superior handling and processing ease.

**CAS:** 68554-70-1

**INCI Name:** Polymethylsilsequioxane

**Benefits:**

- Gives skin a smooth, silky, powdery feel. Masks and blurs wrinkles
- Effectively absorbs sebum
- Provides good surface-slip and anti-caking properties

**Applications:** Creams, foundations, lipsticks, eye shadows, eyeliners, mascara and powder products.

Prices starting at \$11.00

## Silicone Gel

ELL-CYCDIMVIN-01

Non-emulsifying elastomer gel made of an organosiloxane polymer dispersed in cyclopentasiloxane. It functions as a thickener in formulations while delivering smooth applications.

**CAS:** 541-02-6, 556-67-2

**INCI Name:** Cyclopentasiloxane, dimethicone/vinyltrimethylsiloxysilicate crosspolymer

### Benefits:

- Easily spreadable on skin and gives a non-greasy feel
- Thick emollient that adds viscosity and substance to creams
- Leaves a non-tacky film
- Can be used as primer under makeup
- Allows easy incorporation of cosmetic ingredients like pigments

**Applications:** Creams, lotions, sunscreen, makeup, lipsticks, hair care.

Prices starting at \$18.90

## Silicone Resin

ELL-TRIPOL-01

Unique combination of silicone resins especially developed to provide excellent transfer and wash-off resistance combined with a flexible film for long-lasting, long-wearing, smudge-proof cosmetic products.

**CAS:** 56275-01-5, 115341-02-1

**INCI Name:** Trimethylsiloxysilicate, polypropyl silsesquioxane

### Benefits:

- Excellent film former for long-lasting, rub-off resistant and long-wearing permeable films
- Improves color intensity and shine
- Enhances the SPF wash-off resistance in sunscreens
- Provides non-tacky, silky feel when dried

**Applications:** Sunscreens, makeup, foundation, lipsticks, color cosmetics that need wash-off & rub-off resistance.

Prices starting at \$18.30

## Vitamin C in Silicone (20% L-ascorbic acid)

VIT-VITCSIL-01

Active form of vitamin C stabilized in an elastomer dispersion. Contains 20% pure L-ascorbic acid providing all antioxidant and anti-aging benefits in an easy to use blend.

**CAS:** 541-02-6, 50-81-7, 63394-02-5, 156065-02-0, 29383-26-4, 29710-25-6

**INCI Name:** Cyclopentasiloxane, L-ascorbic acid, polysilicone-11, ethylhexyl hydroxystearate

### Benefits:

- Potent antioxidant
- Can improve appearance of aged and fragile skin
- Widely used add-on ingredient in skin-lightening products
- Antioxidant effect can be increased by combining L-ascorbic

**Applications:** Serums, lotions, sun care & after sun products, sticks & makeup.

Prices starting at \$5.70

## Specialty Emollients

### Wrinkle Blur

ELL-WRBL-01

Wrinkle-masking silicone elastomer powder with silica-treated coating. Composition absorbs fluid and enables the powder to flow freely without agglomeration.

**CAS:** 156065-02-0, 112945-52-5

**INCI Name:** Dimethicone/vinyl dimethicone crosspolymer, silica

**Benefits:**

- Masks and blurs wrinkles up to 84% as shown in studies
- Absorbs sebum and gives skin a smooth, silky, powdery feeling
- Ideal for formulating color cosmetics, skin, and more

**Applications:** Pressed and loose powder, foundation powder, and compact powder, eye shadow, blush, lipstick, creams, lotions, sun care products.

Prices starting at \$6.80

## Specialty Emollients

### C12-15 Alkyl Benzoate

ELL-ALBZ-01

C12-15 alkyl benzoate is a low-molecular weight ester of benzoic acid and C12-15 alcohols.

**CAS:** 68411-27-8

**INCI Name:** C12-15 alkyl benzoate

**Benefits:**

- Versatile emollient ester suitable for use in skin care, sun care, and color cosmetics
- Can be used to improve the texture of a product
- Offers excellent emolliency with added pigment-dispersing capabilities
- Can be used as an effective solvent for sunscreens

**Applications:** Lotions, creams, sun products, color cosmetics.

Prices starting at \$6.00

### Cetyl Palmitate

ELL-CEPA-01

Pure vegetable lipid ester derived from cetyl alcohol & palmitic acid. Cetyl palmitate is a natural substance as it occurs naturally in spermaceti of sperm whales.

**CAS:** 540-10-3

**INCI Name:** Cetyl palmitate

**Benefits:**

- Great skin-conditioning and emollient ingredient
- Used as occlusive and masking ingredient
- Enhances emulsion stability
- Excellent film former
- Reduces greasy feel of oil systems

**Applications:** Color cosmetics, hair care, lotions, creams, moisturizers, cleansers, deodorant sticks, sunscreens.

Prices starting at \$6.40

## Dimethicone 500

ELL-DIMT-01

100% active linear silicone polymer with a viscosity of 500 cps. Linear silicones are large high-molecular polymers and usually are viscous and more oil-like.

**CAS:** 9006-65-9

**INCI Name:** Dimethicone

### Benefits:

- Used for its chemical stability in anti-foams, color cosmetics, and hair care products
- Removes whitening of creams when rubbed into skin.
- Improves wet and dry combing
- Makes colors more dispersible

**Applications:** Hair & skin conditioning products as shampoos, conditioners, creams, lotions, but also color cosmetics. Skin protectant products.

Prices starting at \$8.10

## Iso-Dimethicone Copolymer

ELL-ISDICO-01

Non-cross linked, non-alkyl containing silicone polymer blended with the hydrocarbon emollient isododecane.

**CAS:** 141-70-5, 13475-82-6, 156065-02-0

**INCI Name:** Isododecane, Bis vinyl dimethicone/dimethicone copolymer

### Benefits:

- Reduces tackiness and greasiness of skin care products
- Gives matte and powdered after-feel to the skin
- Designed to enhance texture, gloss, and film integrity of formulas
- Provides fast drying, very light spreading and silky feel to emulsions and anhydrous products

**Applications:** Color cosmetics, skin & hair care, serums, lotions & creams.

Prices starting at \$23.80

## IsoLanolin

ELL-ISLAN-01

Low viscosity esterified lanolin sterol that contains hydrophobic esterified lanolin sterol but also hydrophilic non-esterified sterols.

**CAS:** 142-91-6, 8038-43-5, 70321-63-0

**INCI Name:** Isopropyl palmitate, lanolin oil

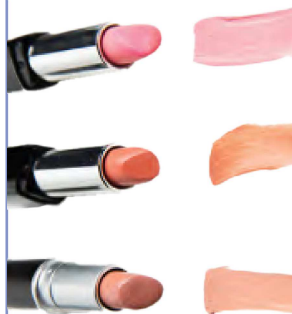

### Benefits:

- Excellent emollient
- Has surfactant properties that help stabilize both water-in-oil and oil-in-water emulsions
- Very useful for wetting pigments
- Can be used as the sole binding agent in pressed powders.

**Applications:** Creams, lotions, hair care, sun care, lip care and makeup, pressed powders.

Prices starting at \$4.40

## Isododecane

ELL-ISOD-01

Hydrocarbon that is most often used as an emollient and solvent in skin care products.

**CAS:** 31807-55-3

**INCI Name:** Isododecane

**Benefits:**

- Has a weightless feel on skin and enhances spreadability of products
- Helps prevent evaporation of water from the skin
- Excellent emollient that can be used as replacement to oils
- Compatible with silicones
- Conditions hair & skin

**Applications:** Mascara, eyeliner, creams, lotions, hair care, conditioners, hairsprays, perfumes.

Prices starting at \$7.50

## Isocicosane

ELL-ISOE-01

Non-volatile hydrocarbon emollient consisting of a mixture of highly branched C20 isoparaffin hydrocarbons.

**CAS:** 52845-07-5, 93685-79-1

**INCI Name:** Isocicosane

**Benefits:**

- Suitable replacement for mineral oil in "oil-free" products
- Has great spreadability
- Provides a satiny feel to the skin and is non-comedogenic
- Effective plasticizer for color cosmetics.
- Compatible with silicones and conditions hair & skin.

**Applications:** All kinds of skin care, hair care & sun care products, various color cosmetics.

Prices starting at \$8.10

## Isopropyl Myristate

ELL-ISOMYR-01

Ester of isopropyl alcohol and myristic acid . Low viscosity fluid non-greasy emollient, tolerates a wide pH range, compatible with most surfactants.

**CAS:** 110-27-0

**INCI Name:** Isopropyl myristate

**Benefits:**

- Superior emollient for non-greasy bath, body and baby oils
- Lubricant and compression aid for pressed powders
- Light & non-tacky emollient for creams and lotions.
- Can gently lift makeup and surface dirt - at high concentrations
- Gives gloss and shine to hair
- Resistant to oxidation

**Applications:** Creams, lotions, hand creams, shampoo, shower gels, makeup removers, powders and foundations.

Prices starting at \$6.70

## Mineral Oil, USP

ELL-MIOL-01

Liquid mixture of hydrocarbons obtained from petroleum.

**CAS:** 8012-95-1, 8020-83-5, 8042-47-5

**INCI Name:** Mineral oil (Paraffinum Liquidum)

**Benefits:**

- Effective emollient that feels great on the skin
- Non-comedogenic

**Applications:** All kinds of skin care, hair care & sun care products, various color cosmetics. Skin protectant products.

Prices starting at \$6.10

## Octyldodecanol

ELL-OCDO-01

It is produced from natural fats (non animal) and oils by reduction of the fatty acid grouping to the hydroxyl function. Stable to hydrolysis and can be used over a wide pH range.

**CAS:** 5333-42-6

**INCI Name:** Octyldodecanol

**Benefits:**

- Emollient, solvent, and moisturizer for all kinds of skin care products
- Provides the skin with a soft, smooth appearance
- Ideal solvent to dissolve salicylic acid

**Applications:** All kinds of skin care, sun care products, various color cosmetics.

Prices starting at \$8.65

## PEG-8 Dimethicone

ELL-PEG8DI-01

PEG-8 Dimethicone is a water soluble nonionic dimethicone copolyol.

**CAS:** 68937-54-2

**INCI Name:** PEG-8 dimethicone

**Benefits:**

- Improves the feel of the skin
- Detackifies ingredients in formulas
- Adds additional moisturization to surfactant systems
- Adds slip to carbomer based formulas

**Applications:** Creams, lotions, hair care products, shower gels, sun care, makeup.

Prices starting at \$16.00

## Petroleum Jelly (Petrolatum), USP

ELL-PETRJL-01

Semi-solid mixture of hydrocarbons obtained from petroleum. USP grade. Translucent paste, odor-less. Does not oxidize on air exposure.

**CAS:** 8009-03-8

**INCI Name:** Petrolatum

**Benefits:**

- Excellent emollient, moisturizer & lubricant
- Enhances consistency and viscosity
- Protects skin from wind, burns, and chapping
- Prevents diaper rash
- Ideal for dry skin treatments

**Applications:** Pressed and loose powder, foundation powder, and compact powder, eye shadow, blush, lipstick, creams, lotions, sun care products.

Prices starting at \$4.70

## Polyisobutene 250

ELL-POLIS-01

Low-viscosity (Average MW 250 D) nonpolar polymer oil (liquid isoparaffin, propane-2-methyl- homopolymer), mineral oil substitute.

**CAS:** 68937-10-0

**INCI Name:** Hydrogenated polyisobutene

**Benefits:**

- Excellent emollient and moisturizer, restores skin suppleness, and prevents water loss
- Pigment dispersing agent for color cosmetics
- Enhances SPF retention in sunscreens
- Shine enhancer for lip care products
- Improves spreadability of creams
- Non-comedogenic, non-irritant, non-greasy

**Applications:** Hydrating creams, after shave balms, antiperspirants, color cosmetics, creams for blemished and impure skin, and more.

Prices starting at \$9.10

## Polyisobutene 1200

ELL-POLIS-03

High-molecular weight (Average MW 1,200 D) nonpolar polymer oil (synonym: hydrogenated butene homopolymer). Great mineral oil substitute.

**CAS:** 68937-10-0

**INCI Name:** Hydrogenated polyisobutene

**Benefits:**

- Emollient & moisturizer
- Repairs skin suppleness, prevents water loss
- Easily emulsifiable
- Disperses pigments for color cosmetics
- Ensures SPF retention in sunscreens
- Improves spreadability of creams

**Applications:** Hydrating & cleansing creams, color cosmetics, deodorants, sunscreen products, creams for blemished skin, and more.

Prices starting at \$13.30

## Squalane ELL-SQUAL-01

100% plant-based emollient derived from plant sugars. Squalane occurs naturally in the lipidic layers of the skin and prevents moisture loss while restoring the skin's suppleness and flexibility.

**CAS:** 111-01-3

**INCI Name:** Squalane

**Benefits:**

- Highly moisturizing emollient that has high resistance to oxidation and high affinity to skin and its natural lipids
- Excellent skin-penetrating qualities
- Medium spreading qualities
- Non irritating, non- allergenic, hypo-comedogenic

**Applications:** Skin creams, lotions, hair care, massage oils, makeup products and lip care.

Prices starting at \$16.40

## Stearyl Palmitate ELL-STPA-01

Pure vegetable ester derived from stearyl alcohol & methyl palmitate. Melting point 57oC (135oF).

**CAS:** 2598-99-4

**INCI Name:** Stearyl palmitate

**Benefits:**

- Effective thickener with emollient properties
- Provides enhanced whiteness in creams and lotions
- Enhances emulsion stability
- Excellent film former
- Reduces the greasy feel of oil systems
- Improves payoff characteristics in stick cosmetics

**Applications:** Color cosmetics (incl. lipsticks), hair care, lotions, creams, moisturizers, cleansers, bath oils & scrubs, deodorant sticks, sunscreens.

Prices starting at \$9.80

## Sucrose Cocoate ELL-SUCO-01

Natural hydrophilic emollient and moisturizer made of sucrose esters of coconut fatty acid. Preservative-free and PEG-free.

**CAS:** 91031-88-8

**INCI Name:** Sucrose cocoate

**Benefits:**

- Provides pleasant re-fattening and emollient effects
- Effective moisturizer
- Increases foam density, viscosity and mildness of cleansing products
- Increases gentleness and creaminess of creams & lotions
- Has mild thickening effect

**Applications:** Hair & body & face cleansing formulations, as moisturizer & emollient in creams & lotions.

Prices starting at \$13.90

## Triglyceride

ELL-TRGL-01

Lipid (triesters) composed of glycerin, caprylic & capric fatty acids. It's based on saturated even-numbered, unbranched natural fatty acids of vegetable origin. Triglyceride is not the same as fractionated coconut oil.

**CAS:** 73398-61-5, 65381-09-1

**INCI Name:** Caprylic / capric triglyceride

**Benefits:**

- Low-viscosity emollient and lubricant
- Improves spreading of creams and lotions
- Excellent solvent for lipophilic active ingredients and UV filters
- Free from antioxidants and other stabilizing additives
- Approved for use in NSF/ANSI Standard 305 certified products

**Applications:** Widely applicable as emollient for "oil-free products", non-oxidizing fat base & solvent of active ingredients in skin, hair, and makeup products.

Prices starting at \$5.20

## Natural Gel-Wax

ELL-WAGE-01

Very versatile natural wax gel, can replace petrolatum in a formulation, being used as natural emollient and thickener for emulsions.

**CAS:** 8001-79-4, 8012-89-3, 8015-86-9

**INCI Name:** Ricinus Communis (castor) seed oil, hydrogenated castor oil, beeswax, copernicia cerifera (carnauba) wax

**Benefits:**

- Excellent viscosity enhancer & emollient for lip gloss
- Can be diluted further if needed to be less viscous
- Adds also emolliency and viscosity to lotions & creams

**Applications:** Creams, lotions, pomades, lip gloss protective creams, makeup products.

Prices starting at \$6.10

## Caprylyl Glycol EHG

HUM-CAEHG-01

Blend of caprylyl glycol (67-73%) and ethylhexylglycerin (27-33%). Glycols are known to be antimicrobial and show antimicrobial efficacy against typical germs found in cosmetic formulations.

**CAS:** 1117-86-8, 70445-33-9

**INCI Name:** Caprylyl glycol, ethylhexylglycerin

**Benefits:**

- Effective humectant and emollient providing unique skin feel
- Has antimicrobial efficacy
- Boosts efficacy of traditional preservatives
- Provides deodorizing efficacy
- Accepted by Whole Foods

**Applications:** All kinds of leave-on & rinse-off personal care and cosmetic products.

Prices starting at \$12.30

## Glycerin, USP HUM-GLYC-01

Polyhydric sugar alcohol present in all natural fats, oils, and phospholipids, degraded to glucose in body. Doesn't contain bovine, ovine, caprine, or other animal-derived materials.

**CAS:** 56-81-5

**INCI Name:** Glycerin

### Benefits:

- Effective humectant
- Protects the lipids of skin cells
- Good solvent for various water-insoluble ingredients
- Effective emollient and lubricant properties

**Applications:** All kinds of skin care products, hair care products, color cosmetics, soaps (glycerin soap).

Prices starting at \$6.10

## Jojoba Gel THK-JOGE-01

Anhydrous transparent viscous gel consisting of jojoba oil (*Simmondsia chinensis*) combined with polymers.

**CAS:** 61789-91-1 (polymer exempt)

**INCI Name:** Jojoba oil, ethylene/propylene/styrene copolymer, butylene/ethylene/styrene copolymer

### Benefits:

- Multi-purpose gel thickener and emollient
- Ideal to make high-viscosity oil phase for improved stability and thickness
- Gives a noticeable shine to lip care products
- High viscosity allows the addition of more oils to emulsions
- Improves spreadability of massage oils
- Ideal to wet dyes and pigments for color cosmetics

**Applications:** All kinds of emulsions (creams, lotions, cleansers, hair creams, makeup foundations), lip care products, massage oils, baby oils.

Prices starting at \$19.90

## Polyamide 3 THK-POLYA-01

Partially vegetable-derived rheology modifier for formulation with low to high polarity organic liquids. High bio-renewable content.

**CAS:** 1093268-29-1

**INCI Name:** Polyamide-3

### Benefits:

- Provides benefits including uniform delivery of actives and more
- Forms shear thinning emulsions
- Can stabilize emulsions over a broad pH range and accommodate high oil and fat loadings
- Forms gelled oil-in-water and water-in-gelled-oil PH insensitive emulsions
- Ads water-resistance to sunscreens and stabilizes inorganic UV filters
- Compatible with common emollients used in sun care emulsions

**Applications:** Creams, lotions, sticks, sunscreen, color cosmetics, and more.

Prices starting at \$8.80

## Methyl Gluceth-10

ELL-METGL10-01

Natural glucose derivative made as polyethylene glycol ether of methyl glucose.

**CAS:** 68239-42-9

**INCI Name:** Methyl gluceth-10

### Benefits:

- Effective water-retention properties
- Enhances spreadability of products
- Can significantly reduce skin irritation associated with any anionic and amphoteric surfactants
- Provides a smooth and gentle feel
- Has also thickening and emulsifying properties

**Applications:** Lotions, creams, after-shave products, bar soaps, bath products, shampoos and cleansing products.

Prices starting at \$7.10

## Palmitic Acid

EMF-PALMITACID-01

Emulsifying fatty acid derived from palm oil that is made in an environmentally sustainable manner by a manufacturer who is a full-fledged member of the Roundtable on Sustainable Palm Oil (RSPO) and fully complies with all domestic and international regulatory requirements for fair trade.

**CAS:** 57-10-3

**INCI Name:** Palmitic acid

### Benefits:

- Acts as viscosity builder, emollient and co-emulsifier
- Acts also as super-fatting agent and opacifier
- Widely used to improve emollience and thickness of emulsions

**Applications:** Creams, cream rinses, shampoos and conditioners, soaps, and many other basic cosmetic preparations.

Prices starting at \$19.90

## Butylene Glycol

HUM-BUTGLYC-01

Organic multi-purpose alcohol used as humectant, solvent, antimicrobial agent and emollient. Offers characteristics such as preventing the assimilation of water from atmospheres of high humidity into film-forming preparations and preventing crystallization of insoluble components.

**CAS:** 107-88-0

**INCI Name:** 1,3 butylene glycol

### Benefits:

- Can be used across a wide range of leave-on and rinse-off formulations
- Widely used as alternate solvent for glycerin or propylene glycol in water-based systems
- Can stabilize volatile compounds such as fragrances and flavors
- At 8-10% butylene glycol, has anti-microbial activity against bacteria, molds and yeasts

**Applications:** Serums, creams & lotions, hair care products, more.

Prices starting at \$8.25

## Isopropyl Palmitate

ELL-ISOPROPALM-01

Multi-functional fatty acid made of the ester of isopropyl alcohol and palmitic acid derived from renewable vegetable oils. It's biodegradable and GMO-free.

**CAS:** 142-91-6

**INCI Name:** Isopropyl palmitate

### Benefits:

- Has excellent emollient and lubricant properties
- Non-tacky, non-oily, fast spreading, and effective absorption
- Widely used as wetting agent and fragrance enhancer
- Has slight anti-static properties

**Applications:** Bath oils, skin creams, sunscreens, shaving creams, vanishing creams, hair conditioner, pre-shaves & aftershaves, shampoos, bath oils, aerosol antiperspirants and deodorants.

Prices starting at \$16.90

## Cholesterol NF

ELL-CHOLE-01

Cholesterol is a sterol that produces the emollient effect of lanolin alcohols. The skin lipids that are present on skin surface contain cholesterol. Obtained from sheep wool derivatives.

**CAS:** 57-88-5

**INCI Name:** Cholesterol

### Benefits:

- NF/USP grade
- Excellent natural emollient
- Cholesterol helps dry hair and skin.
- Can increase water retention and barrier properties of skin & hair
- Restores barrier properties of damaged skin

**Applications:** Creams, lotions, hair care products (conditioners, hair pomades).

Prices starting at \$22.90

## Lanolin Wax

ELL-LANOLWAX-01

High melting wax fraction separated from lanolin USP.

Melting point: 45-55°C (113-131F).

**CAS:** 68201-49-0

**INCI Name:** Lanolin wax

### Benefits:

- A thickener that provides consistency, stability, and emolliency
- Provides an elegant and silky feel on the skin
- When combined with ethylene and propylene oxides, it provides increased water solubility and performs as non-ionic surfactant

**Applications:** Creams, lotions, gels, sunscreens, stick formulations incl. lipsticks and deodorants, shampoos, conditioners & hair styling products

Prices starting at \$12.30

## Triglyceride Blend

ELL-CCMSTRIGL-01

Specialty blend of triglycerides based on saturated even-numbered, unbranched natural fatty acids of vegetable origin.

**CAS:** 208126-53-8

**INCI Name:** Caprylic/capric/myristic/stearic triglyceride

**Benefits:**

- Used as a non-oxidizing emollient or fat base
- Does not leave a tacky feel or greasy shine on the skin
- Spreads well on the skin and penetrates easily
- Does not inhibit natural skin respiration
- Free of skin-irritating substances such as heavy metals, catalysts, solvents antioxidants, and other stabilizing additives

**Applications:** Widely applicable as emollient for "oil-free products", non-oxidizing fat base & solvent of active ingredients in skin, hair, and makeup products.

Prices starting at \$8.90

## Amodimethicone

ELL-AMDI-01

Milky, white silicone emulsion (amino-modified polydimethylsiloxane emulsion) offering excellent conditioning & softening properties.

**CAS:** 68554-54-1, 24938-91-5, 112-02-7

**INCI Name:** Amodimethicone, trideceth-12, cetrimonium chloride

**Benefits:**

- Water soluble silicone emulsion
- Protects the hair shaft, moisturizes hair, and adds softness
- Adds a silky feel to skin care creams and reduces greasiness

**Applications:** Hair & skin conditioning products as shampoos, conditioners, creams, lotions.

Prices starting at \$9.90

## Squalane Light

ELL-SQUAL-02

Non-volatile, non-polar plant-derived C15-hydrocarbon oil that is a perfect alternative for petroleum-based paraffins and silicone ingredients.

**CAS:** 3891-98-3 (or 64741-76-0)

**INCI Name:** Hydrogenated farnesene (or C13-15 alkane)

**Benefits:**

- NPA certified (The Natural Seal)
- Creates elegant and light textures
- High spreadability
- Can be used as dispersing agent for crystalline UV filters like titanium dioxide or zinc oxide

**Applications:** All kinds of skin care products, hair conditioners, lip balms, lip sticks, makeup.

Prices starting at \$12.40

## Cyclomethicone

ELL-CYCLM-01

100% active cyclic silicone polymer blend consisting of siloxane D4 and siloxane D5. Cyclic silicones are low-molecular weight silicones and are not viscous but very fluid and often used as solvents. Linear silicones are large high-molecular polymers that are viscous and more oil-like.

**CAS:** 556-67-2, 541-02-6

**INCI Name:** Cyclotetrasiloxane, cyclopentasiloxane

### Benefits:

- Rapidly evaporates without cooling the skin.
- Ideal carrier for makeup, other color cosmetic skin creams, deodorants, and stick products without the oily feel
- Provides excellent stability and aesthetics

**Applications:** Color cosmetics, creams, deodorants, sticks, hair care products.

Prices starting at 10.10

## Propanediol 1,3

HUM-PROP-01

A natural, skin-friendly preservative-boosting humectant for all kinds of formulations. It's made from renewable corn sugar fermentation. Has excellent sensory characteristics and is environmentally sustainable.

**CAS:** 504-63-2

**INCI Name:** Propanediol 1,3

### Benefits:

- 100% Natural
- Can be used to replace petroleum-based glycols such as propylene glycol, butylene glycol or glycerin in fo
- Improves skin moisturization

**Applications:** Creams, lotions, shampoos, conditioners, sun care, skin treatments.

Prices starting at \$9.80

## Lanolin Alcohol

WAX-LNAL-02

Highly purified mixture of aliphatic alcohols, steroid alcohols & triterpenoid alcohols obtained by hydrolysis of USP grade lanolin (fat of sheep wool). Small pellets for easing formulating.

**CAS:** 8027-33-6

**INCI Name:** Lanolin alcohol

### Benefits:

- Non-gelling thickener and emollient
- Provides smooth and soft feel
- Increases viscosity in emulsions
- Has good moisturizing properties

**Applications:** Lipsticks, lip balm, antiperspirant sticks, various emulsion (lotions, creams and hand creams).

Prices starting at \$17.90

## Myristyl Myristate

ELL-MYRMYS-01

Non-greasy solid emollient is the ester of myristyl alcohol & myristic acid. Enhances esthetic properties of skin care products, gives more body & spreadability.

**CAS:** 3234-85-38001-21-6

**INCI Name:** Myristyl myristate

### Benefits:

- Increases the body of creams and lotions
- Imparts a soft, slightly waxy after feel
- Acts as super-fatting agent for soaps and lubricant for shaving creams
- Suitable for use across a wide pH range
- Compatible with anionic, nonionic and cationic surfactants

**Applications:** Soaps, creams, makeup, lotions, hair conditioners, shaving products.

Prices starting at \$7.20

## Isohexadecane

ELL-ISOHEX-01

Branched hydrocarbon dry-finish emollient that leaves a light silky feeling on the skin. Clear, odorless liquid.

**CAS:** 4390-04-9, 60908-77-2

**INCI Name:** Isohexadecane

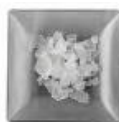

### Benefits:

- Excellent emollient and skin-conditioner
- Ideal cleansing ingredient for face and eye makeup cleansers
- Compatible with silicone

**Applications:** Face creams, lotions, makeup, face oils, color cosmetics, makeup removers, hair care.

Prices starting at \$8.30

## Silicone Resin

ELL-TRIPOL-01

Unique combination of silicone resins especially developed to provide excellent transfer and wash-off resistance combined with a flexible film for long-lasting, long-wearing, smudge-proof cosmetic products.

**CAS:** 56275-01-5, 115341-02-1

**INCI Name:** 56275-01-5, 115341-02-1

### Benefits:

- Excellent film former for long-lasting, rub-off resistant and long-wearing permeable films
- Enhances the SPF wash-off resistance in sunscreens
- Provides non-tacky, silky feel when dried

**Applications:** Sunscreens, makeup, foundation, lipsticks, color cosmetics that need wash-off & rub-off resistance.

Prices starting at \$18.30

## Silicone Gel ELL-CYCDIMVIN-01

A non-emulsifying elastomer gel made of an organosiloxane polymer dispersed in cyclopentasiloxane. It is a semitransparent gel that functions as a thickener in formulations while delivering smooth applications.

Creamy, semitransparent gel.

**CAS:** 541-02-6, 556-67-2

**INCI Name:** Cyclopentasiloxane, dimethicone/vinyltrimethylsiloxysilicate crosspolymer

### Benefits:

- Easily spreadable on skin and gives a nice, non-greasy, silky skin feel
- Thick emollient that adds viscosity and substance to creams
- Non-tacky film on the skin and improves water resistance of formulas
- Can be used as primer under makeup
- Provides a substantive hydrophobic film

**Applications:** Creams, lotions, sunscreen, makeup, lipsticks, hair care.

Prices starting at \$18.90

## Castor Wax TEX-CASWAX-01

Vegetable-derived (vegan), hydrogenated castor oil derivative that is used as an emollient and thickener in a variety of cosmetic products.

**CAS:** 8001-78-3

**INCI Name:** Hydrogenated castor oil

### Benefits:

- Increases viscosity in lotions, creams, and ointments
- Stabilizes stick products, increases melting point of lip sticks, and lip balms
- Acts as effective emollient

**Applications:** Stick products, also deodorants, lip balms, pomades, foundations, creams, lotions.

Prices starting at \$6.90

## Ethylhexyl Palmitate ELL-ETHXPL-01

Ester of 2-ethylhexanol and palmitic acid. Synonym: Octyl Palmitate. Saponification value 130 - 160. Clear amber liquid.

**CAS:** 29806-73-3

**INCI Name:** Ethylhexyl palmitate

### Benefits:

- Non-occlusive emollient that provides a silky feel in various skin and hair care products
- Medium spreading
- Can replace mineral oil in formulations

**Applications:** Color cosmetics, pressed powders, skin care product, sun care products.

Prices starting at \$5.70

## Dimethicone Fluid

ELL-DIMT-02

100% active linear silicone polymer with a viscosity of only 10 cps. Usually, linear silicones are large high-molecular polymers and are viscous and more oil-like, whereas this special dimethicone is a non-viscous form.

**CAS:** 63148-62-9

**INCI Name:** Dimethicone

**Benefits:**

- Used for its low viscosity in various liquid, low-viscous skin and hair care products
- Will take out the whitening of creams and lotions when rubbed into the skin
- Improves wet and dry combing
- Makes colors more dispersible (acts as solvent)

**Applications:** Hair & skin conditioning products as shampoos, conditioners, creams, lotions, and color cosmetics. Skin protectant products.

Prices starting at \$12.90

## Lauryl Laurate

ELL-LAURYLTE-01

Plant based, low-molecular weight emollient, slip agent, and skin-penetrating agent for anhydrous systems. The low melting point helps to increase the stability of cosmetic formulations.

**CAS:** 13945-76-1

**INCI Name:** Lauryl laurate

**Benefits:**

- Multi-functional emollient and film-former
- Can replace ester oils in cosmetic formulas
- Provides a silicone like after-feel
- Enhances whiteness in creams and lotions
- Improves emulsion stability

**Applications:** Creams, pomades, salve, ointments, eye shadows, pencil and stick cosmetics, hot pour make-up, hair care products, antiperspirants.

Prices starting at \$9.20

## Hectorite Gel SOFT

THK-HECGE-02

Very versatile dispersion of hectorite blended with triglyceride for adding viscosity of oil-phase systems. Hectorite is a natural, soft, greasy, white clay mineral occurring in volcanic ash and tuff.

**CAS:** 73398-61-5, 12691-60-0, 108-32-7

**INCI Name:** Caprylic/capric triglyceride, stearylalkonium hectorite, propylene carbonate

**Benefits:**

- Can be used hot or cold to thicken oil phase systems
- Provides viscosity control
- Enhances skin feel by masking greasy or tacky components
- Provides softness and silkiness to the skin and color cosmetics
- Possesses shear-thinning viscosity

**Applications:** Emulsions (creams, lotions), sun care, mascara, lip color, lip glosses, massage gels.

Prices starting at \$19.50

## Ethylhexyl Olivat

ELL-ETHXOL-01

Natural emollient made from olive oil as an alternative to silicones including dimethicone and cyclopentasiloxane, cyclohexasiloxane.

**CAS:** 22047-49-0, 111-01-3

**INCI Name:** Hydrogenated ethylhexyl olivate, hydrogenated olive oil unsaponifiables

### Benefits:

- Contains nourishing phytocompounds to support healthy skin
- Adds protective film and reduces greasiness to soften hair
- Leaves a non-tacky film due to it being a low-viscosity emollient
- Can be used as silicone replacement
- Improves spreading of creams and lotions and provides an even protective film to hair

**Applications:** Face and body creams and lotions, hair care products (shampoos, conditioners), sunscreens, after-sun cooling gels.

Prices starting at \$9.20

## Tribehenin

THK-TRIBHEN-01

Tribehenin is the triglyceride of behenic (C22) acid. It is a very soft and amorphous (non-crystalline) wax and can be used to modify the properties of other waxes by softening structure and reducing crystallinity, and rigidity.

**CAS:** 18641-57-1

**INCI Name:** Tribehenin

### Benefits:

- Imparts gloss to stick systems, improves pay-off, and provides products with a smooth application and pleasant feel
- Particularly useful for formulating anhydrous systems such as lip salves and soft solid antiperspirants
- Can also be used as a suspending and thickening agent

**Applications:** Stick products, deodorants, lip balms, pomades, foundations, creams, lotions.

Prices starting at \$16.20

## Aloe Vera Palmitate

HUM-ALVEPAL-01

Mixture of aloe vera extract and ethylhexyl palmitate which is an ester of 2-ethylhexanol and palmitic acid. Dissolved in safflower seed oil. It is a medium spreading, non-occlusive emollient with excellent moisturizing effects.

**CAS:** 29806-73-3, 85507-69-3, 8001-23-8

**INCI Name:** Ethylhexyl palmitate (and) Aloe Barbadensis (aloe vera) extract, safflower oil

### Benefits:

- Non-occlusive emollient with a rich, non-oily, silky skin feel
- Offers great moisturizing and soothing properties
- Can replace mineral oil in formulations

**Applications:** Creams, lotions, gels, color cosmetics, pressed powders, hair and sun care products.

Prices starting at \$10.10

## Oat Emollient OIL-OATEMOL-01

Natural oily lipid complex cold-pressed from oat kernels. Contains 10% polar lipids, >1% ceramides and sphingolipids, 16.8% saturated fatty acids, 43.8% monosaturated fatty acids, and 39.4% polyunsaturated fatty acids.

**CAS:** 84012-26-0

**INCI Name:** Avena Sativa (Oat) kernel oil

### Benefits:

- Outstanding skin absorbancy resulting in a non-greasy feeling
- Non-comedogenic oil shown to reduce occurrence of papules, blackheads, and lesions
- Acts as an occlusive and a humectant due to the high ceramide content
- Approved by Ecocert in accordance with the COSMOS standard
- Hypoallergenic, free from allergens

**Applications:** Creams, lotions, ointments, bath oils, hair care & sun care products, baby care products.

Prices starting at \$14.90

## Marula Tetradecane ELL-MARUTETRA-01

Light, luxurious, non-polar emollient made from 100% vegetable derived tetradecane and Marula kernel oil. Can replace silicones in formulations.

**CAS:** 68956-68-3, 629-59-4

**INCI Name:** Sclerocarya Birrea (Marula) kernel oil, tetradecane

### Benefits:

- Natural alternative to fluid silicones
- Ideal emollient for sensitive skin
- Obtained from renewable sources
- Quick evaporation with dry after-feel
- Excellent spreadability and stable against oxidation

**Applications:** Creams, lotions, color cosmetics, makeup, sun care products, baby care products.

Prices starting at \$13.60

## VollLip THK-VOLLIP-01

Proprietary blend of oils, extracts, active ingredients and polymers creating an effective lip plumping complex that enhance the appearance of lips for instant volumizing and warming effects.

**CAS:** 68937-10-0, 93-60-7, 85940-30-3, 8001-22-7, 8007-08-7

**INCI Name:** Hydrogenated polyisobutene, methyl nicotinate, Capsicum Frutescens fruit extract, Glycine soja (soybean) oil, Zingiber Officinale (ginger) root oil

### Benefits:

- Instantly stimulates lips, promotes natural circulation for fuller lips
- Provides a unique sensory experience
- Instant and long-lasting, along with improved smoothness of lips
- Reduces lipstick feathering

**Applications:** Lipsticks, lip gloss, lip balms, lip pomades.

Prices starting at \$13.30

## Pentylene Glycol BIO

### HUM-PENTGLYC-01

Multifunctional ingredient derived from renewable raw materials from sugar cane. It has the same properties as the synthetically produced pentylene glycol. 100% bio-based carbon and COSMOS approved.

**CAS:** 5343-92-0

**INCI Name:** Pentylene glycol

#### Benefits:

- Effective humectant and wetting agent that prevents water loss
- Excellent solubilizer of other ingredients
- Increases skin permeability of active ingredients
- Has effective emollient and lubricant properties
- Increases spreading properties of emulsions

**Applications:** All kinds of skin care products, hair care products, color cosmetics, soaps (glycerin soap).

Prices starting at \$17.90

## Brassica Oil Copolymer

### ELL-BRSOLCO-01

Biodegradable, COSMOS-approved, botanical based polymer made from sustainable tung (China wood) and rapeseed oils. It forms a flexible and uniform film on the skin and hair for even coverage.

**CAS:** 185323-46-0

**INCI Name:** Brassica Campestris/Aleurites Fordii oil copolymer

#### Benefits:

- Great film-forming properties to repair thermally stressed and frizzed hair
- Silicone substitute: Strengthens hair to prevent breakage
- Improves shine for healthier looking hair
- Non-greasy, silky feel on the skin - enhances, restores, and defends skin
- Made from renewable tung & rapeseed oils. COSMOS approved.

**Applications:** Face creams & lotions, shampoo & conditioners, frizz control serums, primer & post treatments, leave-on conditioners, hair masks.

Prices starting at \$15.30

## BioJelly

### ELL-COCOTRIHEPT-01

Natural, biodegradable elastomer gel with enhanced compatibility with polar materials such as natural oils and organic sunscreens.

**CAS:** 95912-86-0, 620-67-7, 8001-79-4, 112-40-3

**INCI Name:** Coco-caprylate/caprate, triheptanoin, C9-12 alkane, dilinoleic acid/propanediol/PDI crosspolymer

#### Benefits:

- Natural silicone substitute w/ moisturizing feel and emolliency
- Offers unique sensory aesthetics and skin feel
- Compatible with natural oils and various polar materials
- Stable carrier for active ingredients
- Can be formulated into oil-in-water or water-in-oil emulsions
- Fully biodegradable, COSMOS approved, and USDA BioPreferred

**Applications:** Skin care, color cosmetics, body care, sun care, hair care.

Prices starting at \$22.50

## Castor Lip Base

ELL-CASTLIPBS-01

Natural blend of castor oils and carnauba wax forming a viscous, emollient gel that can be used as base for lip care products or as alternative to petrolatum in a variety of cosmetic products.

**CAS:** 8001-79-4, 8001-78-3, 8015-86-9

**INCI Name:** Ricinus communis (castor) seed oil, hydrogenated castor oil, copernicia cerifera (carnauba) wax

### Benefits:

- Natural, botanically derived emollient & lubricant
- Can be used as substitute for petrolatum
- Enhances consistency and viscosity
- Suitable for COSMOS/Ecocert formulations
- Creates an intensive, smooth, moisturized skin feel

**Applications:** Lipsticks, lip balms, creams, lotions, hair care products, hair styling products, creams, lotions, balms, night creams, sun care products

Prices starting at \$7.60

## Coco Caprylate Caprate

ELL-COCOCACA-01

Ester of natural fatty alcohol, caprylic acid and capric acid. 100% derived from natural, renewable feedstocks. Has unique chemical composition and chain length distribution.

**CAS:** 95912-86-0

**INCI Name:** Coco-caprylate / caprate

### Benefits:

- Fast spreading, low-greasiness emollient
- Excellent alternative to dimethicone and other silicones
- Can be incorporated with powders, colorants, and UV filters
- Leaves a pleasant, invisible film on the skin
- Highly stable in a variety of formulations and improves spreadability
- Very useful solubilizing crystalline UV filters for sun care products

**Applications:** Applicable in skin and hair care product as emollient for "oil-free products", and more.

Prices starting at \$9.20

## Dimethicone Satin

ELL-DIMSAT-01

Mixture of low and high molecular weight linear silicones. Linear silicones are large polymers (polydimethylsiloxanes) and usually are viscous and more oil-like.

**CAS:** 9006-65-9

**INCI Name:** Dimethicone

### Benefits:

- Has a different feel than ordinary dimethicones as it provides more cushion, greater slip, with a satiny after-feel
  - Takes out tackiness of products and is greatly moisturizing
  - Provides luxurious skin feels for creams and lotions
- Applications:** Creams, lotions, hair care products, shower gels, sun care, makeup, massage treatments.

Prices starting at \$20.50

Specializing in Cosmetics Ingredients. Since 1997.
