Procedure

Combine phase A except for hyaluronic acid in a beaker, stir well. Sprinkle hyaluronic acid and allow to hydrate for an hour or two, and stir well to combine once hydrated.

Properties

The proteins in this hair toner help strengthen strands while botanical extracts provide shine. Bamboo extract helps fortify the hair and phospholipid coconut-avocado milk hydrates damaged hair. This toner is great on its own, or used in conjunction with a leave-in conditioner for more dehydrated, thirsty hair.
