Citric Acid (citric acid)		0.10	0.24	0.01	0.05

Method

Add phase A one by one into a disinfected glass beaker and stir. Add a very small amount of citric acid to adjust the pH of the formula to 4.5-5.5. Fill the liquid into a pump foamer bottle.

Properties

Leave-in Mousse with provitamin B5 and emollients. The pump foamer bottle will transform the liquid into foam. This a manual pump foamer bottle and not one that is under pressure.
