Phase C					
Astaxanthin Blend	Astaxanthin (and) caprylic/capric triglyceride (and) Hydrogenated Safflower Seed Oil	Antioxidant	0.30	0.30	0.01
Phenoxyethanol SA	Phenoxyethanol, Caprylyl Glycol, Sorbic Acid	Preservative	1.00	1.00	0.04
Fragrance	Fragrance	Fragrance	0.10	0.10	0.00

Procedure

Phase A: Disperse the GelMaker® Hydro in the glycerin, then add to the water portion under good agitation until thickened and smooth. Heat to 75C.
Phase B: Weight and add all ingredients to mixing vessel. Heat to 75C.
Add phase B to phase A under constant stirring (e.g 400-500rpm). Remove from the heat and cool to 40C, reduce rpm to 300. Homogenize for a short time.
Phase C: Add to phase A/B, blend well after each ingredient. Fill treatment pump dispensers, as this has a slow pouring cream consistency.
pH 5.2

Properties

A red algae skin cream featuring Astaxanthin as a potent antioxidant, leaving skin velvety-soft, deeply hydrated and cared for. Enhanced with hydrating Sheabutter and precious plan oils such as certified organic Sea Buckhorn Fruit Oil, to seal in moisture and caring for a long lasting feel. Ideal for the normal to dry skin that likes to absorb the nourishing emollients.
