Fragrance Lemon Verbena		0.20	0.10	0.00	0.02

Method

Give phase A into a disinfected glass beaker and stir. Add phase B into another disinfected glass beaker and stir. Add phase B to phase A and stir very well until the gel is homogenous. Add the other ingredients of C to phase A/B and stir well. The viscosity can be further adjusted with GelMaker EMU. The gel can be filled into treatment pumps, jars or tubes, if too thick to pour using syringe helps. Note: the gelmaker emu has to be shaken well before use.

Properties

Light gel with Sebum-REG, effective long-term regulation of sebum production, reduces greasiness of the skin, prevents skin irritation, leads to smooth skin and improves skin appearance.
