Phase C					
Hexanedio CG	1,2-hexanediol, caprylyl glycol	Anti-microbial agent	0.50	0.50	0.02
Phenoxyethanol	Phenoxyethanol	Preservative	0.40	0.40	0.01
Procedure					

Phase A: Pre-mix Hyaluronic Acid and HE Cellulose with Glycerin until hydrated. Add Butylene Glycol, Propylene Glycol BIO and blend well. Add this mixture to phase A and stir well (propeller mixer at 500rpm). Add remaining ingredients of phase A.

Phase B: Add to phase A, stir well.

Phase C: Add to phase A/B and stir well, homogenize if necessary.

pH 5.7

Properties

Anti-Aging Essence to be applied after serum/or as an alternative to serum. Has good absorption and contains a high amount of botanicals that may help slowing the aging process. Helps increase skin firmness. Contains the HerbaMaker™ line that contains a combination of high powered herbal extracts.
