

2113 - Blush Oil

Weight: 100.00g

Ingredient	INCI	Function	Percent	Wgt (g)	Wgt (oz)
Phase A					
C12-15 Alkane	C12-15 Alkane	Emollient	18.00	18.00	0.63
Isododecane	Isododecane	Emollient	47.30	47.30	1.67
Hectorite Gel SOFT	Caprylic/capric triglyceride, stearylalkonium hectorite, propylene carbonate	Emollient	28.00	28.00	0.99
Mica Coral Red	Mica	Colorant	2.00	2.00	0.07
Mica Pearlwhite	Mica	Colorant	1.00	1.00	0.04
Mica Bordeaux Red	Mica	Colorant	0.50	0.50	0.02
Red 28	CI 45410 (Red 28 Lake)	Colorant	0.20	0.20	0.01
Silica	Silica	Texturizer	3.00	3.00	0.11

Procedure

Phase A: Blend ingredients in order under good stirring at about 300-400rpm. Solution may need to be homogenized shortly for a smooth consistency.

Add colorants under good blending.

Light peach pink shade, with lots of sheer. Color can be intensified by adding a higher amount of micas and/or other desired colorants. We noticed that a sheer tint works better for building color layers than a more concentrated color.

Properties

Light peach pink shade, with lots of sheer. Color can be intensified by adding a higher amount of micas and/or other desired colorants. We noticed that a sheer tint works better for building color layers than a more concentrated color.
