<b>Phase C</b>					
GelMaker EMU (sodium acrylate / sodium acryloyldimethyl taurate copolymer, isohexadecane, polysorbate 80)		1.00	1.00	0.04	0.20
<b>Phase D</b>					
Paraben-DU (propylparaben, methylparaben, diazolidinyl urea, propylene glycol)		1.00	1.00	0.04	0.20
Fragrance Lemon Verbena		0.20	0.20	0.01	0.04

**Method**

Add phase A to a disinfected, heat-resistant glass beaker and heat to 160F/71C. Add phase B into another disinfected glass beaker and heat to the same temperature to melt the ingredients. Remove both beakers from the heat. Add phase B to phase A and stir until uniform. Cool to 60C/122F then add phase C, stir well, the cream will become thicker. Then add phase D, stir again. The cream can be filled into jars

**Properties**

Basic skin cream with precious almond oil that will soften and moisturize the skin. The active ingredient vitamin E acetate is a potent antioxidant and protects the skin from damages by reactive oxygen radicals.
