### 4 FIRST AID MEASURES

<b>Eyes:</b>	Rinse immediately with plenty of water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention.
<b>Inhalation:</b>	Remove person to uncontaminated area. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical advice/attention.
<b>Skin:</b>	Gently wash with plenty of soap and water. Remove contaminated clothing. Drench affected area with water for at least 15 minutes. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
<b>Ingestion:</b>	Get immediate medical advice/attention. Do Not Induce Vomiting without medical advice. Never give anything by mouth to an unconscious person.

### 5 FIRE-FIGHTING MEASURES

<b>Suitable (and unsuitable)</b>	May be combustible at high temperature. Use appropriate media (carbon dioxide, water, dry
----------------------------------	---

**extinguishing media:** chemical powder) for adjacent fire. Do not use heavy water stream.

**Special protective equipment & precautions for firefighters:** Avoid generation of dust. Keep container tightly closed and away from heat, sparks, and flame. Move undamaged containers from immediate hazard area if it can be done safely. Stay upwind/keep distance from source. Wear self-contained, approved breathing apparatus and chemically protective clothing, including eye protection and boots. Wear fire/flame resistant/retardant clothing.

**Flash Points:** ≈190° C

**Specific hazards arising from the chemical:** Potential dust explosion hazard from airborne release. High concentrations of dust or particulate in enclosed spaces may represent a fire/explosion risk. Fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source in a potential dust explosion hazard. See also Stability and Reactivity section.

## 6 ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment & emergency procedures:** Do not try to clean up the leak without proper protective equipment. See section 8 for recommendations on the use of personal protective equipment.

**Environmental precautions:** Avoid liquid release into sewers/public water. Notify environmental authorities in case of large leaks.

**Methods and material for containment and cleaning up:** Contain the spillage using bonding. For larger spills, dike area and pump into waste containers. Mechanically ventilate the spillage area. Use clean-up methods that avoid dust generation (vacuum wet). Avoid creating or spreading dust. Take up mechanically (sweeping, shoveling) and collect in suitable container for disposal.

## 7 HANDLING & STORAGE

**Precautions for safe handling:** Generation of airborne dust. Dust may form flammable and explosive mixture with air. Do not breathe dust. Use approved industrial vacuum cleaner for removal. Avoid raising powdered materials into airborne dust. Provide local exhaust or general room ventilation to minimize exposure to dust. Use grounded electrical/mechanical equipment. Use explosion-proof equipment. Do not eat, drink, or smoke when using this product. Wash hands and other exposed areas with mild soap and water before eating, drinking, smoking, or when leaving work. Wash contaminated clothing prior to reuse. Handle in accordance with good industrial hygiene and safety practice. See section 8 for recommendations on the use of personal protective equipment.

**Conditions for safe storage, incl. any incompatibilities:** Store in cool, dry area. Keep container tightly closed. Shelf life 24 months. Keep in original container. Keep away from open flames, hot surfaces, sources of ignition, and incompatibilities (see section 10 for incompatibilities).

## 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

<u>Component</u>	<u>Exposure Limits</u>	<u>Basis</u>	<u>Entity</u>
Magnesium Stearate	3 mg/m <sup>3</sup>	TWA (Stearates (Except Stearates of Toxic Metals), Respirable Fraction)	ACGIH
	10 mg/m <sup>3</sup>	TWA (Stearates (Except Stearates of Toxic Metals), Inhalable Fraction)	ACGIH

**Personal Protection:**

**Eyes:** In case of dust protection: protective goggles. Use equipment for eye protection tested and approved in accordance with OSHA requirements (29 CFR 1910.133).

**Inhalation:** Dust protection: dust mask with filter type P2. Respirators should be used in accordance with OSHA requirements (29 CFR 1910.134).

**Body:** Use equipment for hand protection tested and approved in accordance with OSHA requirements (29 CFR 1910.138). Thickness of the glove material >0.11mm. Breakthrough time: >480min. Nitrile rubber. Use chemically protective clothing. Chemical resistant safety shoes. (Tested and approved in accordance with OSHA requirements (29 CFR 1910.132) or equivalent).

**Other:** Use good personal hygiene practices. Provide eyewash stations, quick-drench showers and washing facilities

accessible to areas of use and handling. Provide adequate ventilation to minimize dust concentrations. Either local exhaust or general room ventilation is usually required.
