

Sea Kelp Extract

Specification Sheet

Description: Kelp seaweed is a member of the brown algae family (phaeophyta). Root, stem, and leaves have been used in this extract. Contains 20% extract dissolved in water and glycerin. Sea kelp can be found in the colder coastal waters of North America.

CAS: 56-81-5, 7732-18-5, 347174-92-9

INCI Name: Glycerin, Water, Macrocystis Pyrifera (Kelp) Extract

Composition: Glycerin, Water, Macrocystis Pyrifera (Kelp) Extract, Phenoxyethanol

Appearance: Light to medium amber liquid, characteristic odor.

Benefits:

- Has a high content of silicon which help invigorating skin and tissue thereby improving the appearance of wrinkles.
- Contains also various vitamins and minerals which nourish and soothe the skin, especially the root of the hair.

Use: Add to formulas to the water phase. Typical use level: 3-5%. For external use only.

Applications: Anti-aging creams, serums and face masks, hair treatments, root treatment and shampoos.

Solubility: Water-soluble.

Preservation: Phenoxyethanol

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Macrocystis pyrifera (Sea Kelp), glycerin made of naturally derived oils.

Manufacture: Prepared via a cold process to avoid potential loss of effectiveness heat processing can have. Created from naturally grown materials which are extracted first with a specified eluant to yield a concentrate. This concentrate is then dissolved in glycerin and water at a concentration of 20% concentrate and 80% diluents.
