

SkinWhite® Starflower

Specification Sheet

Description: Natural lightening agent obtained from the rhizomes of the Starflower (Hypoxis Rooperi Rhizome). The active ingredient (hypoxoside) is derived from Rooperi Rhizome extract.

CAS: 7732-18-5, 56-81-5, 39300-88-4, 532-32-1, 24634-61-5

INCI Name: Hypoxis Rooperi Rhizome (starflower) extract, caesalpinia spinosa (tara) gum

Composition: Hypoxis Rooperi Rhizome (starflower) extract, caesalpinia spinosa (tara) gum, water, glycerin, sodium benzoate, potassium sorbate

Appearance: Clear viscous, dark brown liquid.

Benefits:

- Hypoxoside has been shown to reduce the production of melanin in hyperreactive melanocytes thereby evening out the skin tone.
- Has effective skin-lightening properties helping to fade age spots, freckles, and hyper-pigmentation.
- Evens out skin color, helping to create a brighter, younger, more radiant complexion.
- Has good antioxidant properties.
- Found to have collagen-stimulating effects in-vitro.

Use: Add to water phase of emulsions or at the end of the formulating process. Typical use level: 1 - 4%. For external use only.

Applications: Skin brightening skin treatments, decollete serums, photo-aging repair creams, body lotions, anti-spot treatments, anti-aging treatments, makeup lines, deodorants.

Solubility: Water-soluble

Preservation: Sodium benzoate, potassium sorbate

Storage: Store light-protected at a cool and dry place.

Country of Origin: Spain

Raw material source: Hypoxis Rooperi Rhizome (Starflower)
