## Gluconolactone SB

### Specification Sheet

**Description:** Natural broad-spectrum antimicrobial blend in powder form consisting of glucono-delta-lactone (microbial fermentation of corn) which has chelating and hydrating benefits and sodium benzoate.

**CAS:** 90-80-2, 532-32-1, 299-28-5

**INCI Name:** Gluconolactone, Sodium Benzoate, Calcium Gluconate

**Composition:** Gluconolactone, Sodium Benzoate, Calcium Gluconate

**Appearance:** White powder

**Benefits:**

- Effective broad-spectrum protection for a wide range of skin and hair care products.
- Active in a wide pH range (best between pH 3-6).

**Use:** Recommended use level of 0.75-2.0%. Performs best in pH 3-6. Compatible with practically all raw materials. Can be added directly to the formulation below 100°F/40°C. For external use only.

**Applications:** All kinds of skin & hair care products (incl. emulsions, aqueous & anhydrous systems), sun care products, makeup products.

**Solubility:** Water-soluble

**Storage:** Store in a closed container at a dry place at room temperature.

**Country of Origin:** USA

**Raw material source:** Gluconic acid, benzoic acid

**Manufacture:** Proprietary blend of three antimicrobial agents. Gluconolactone is produced from an aqueous gluconic acid solution by dehydration involving azeotropic distillation with alcohols, followed by crystallization from the alcohol-containing residue. Calcium gluconate is produced by neutralization of gluconic acid with lime. Sodium benzoate is produced by the neutralization of benzoic acid with sodium bicarbonate.

**Animal Testing:** Not animal tested.
