

Phenoxyethanol SA

Specification Sheet

Description: Blend of phenoxyethanol (50.5-54.5%), caprylyl glycol (40-44%) & sorbic acid (5.0-6.9%), very effective broad-spectrum preservative. Similar to Optiphen (which does not include sorbic acid).

CAS: 122-99-6, 1117-86-8, 110-44-1

INCI Name: Phenoxyethanol, Caprylyl Glycol, Sorbic Acid

Composition: Phenoxyethanol, Caprylyl Glycol, Sorbic Acid

Appearance: Clear to light yellow liquid.

Benefits:

- Effective broad-spectrum preservation against gram-positive and gram-negative bacteria, yeast, and mold.
- Extends shelf life of personal care products typically to 6-18 months.
- Compatible with most cosmetic ingredients.
- Provides emolliency to finished products.

Use: Recommended use level of 0.75-1.50% (restricted to 1% in the EU and Japan), performs best in pH of 6.0, but also proven effective at pH levels up to 10 (ideal pH 4-10). Can be added directly to the formulation during pre- or post-emulsification at or below 60°C/140°F. For external use only.

Applications: All kinds of skin & hair care products (incl. emulsions, aqueous and anhydrous systems), wipes, sun care products, & makeup products.

Solubility: Soluble in water (1g/100g) and alcohols

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Phenol, acetaldehyde

Manufacture: Phenoxyethanol is produced by the hydroxyethylation of phenol in the presence of alkali-metal hydroxides or alkali-metal borohydrides. Sorbic acid is produced synthetically by aldol condensation of acetaldehyde to form crotonaldehyde which is then reacted with ketene to form sorbic acid.
