

## SN-KE Peptide

### Specification Sheet

**Description:** Active compound is based on a synthetic tripeptide that mimics the effect of Waglerin 1, found in the venom of the Temple Viper.

**CAS:** 56-81-5, 7732-18-5, 823202-99-9

**INCI Name:** Glycerin, Water, Dipeptide Diaminobutyroyl Benzylamide Diacetate

**Composition:** Glycerin, Water, Dipeptide Diaminobutyroyl Benzylamide Diacetate

**Appearance:** Clear to pale yellow liquid, no odor.

**pH Value:** Ph range 4.5 - 5.5

**Benefits:**

- The activity of snake peptide reduces the contraction frequency of muscle cells on the face, thereby decreasing the appearance of expression lines.
- In-vivo testing showed an impressive reduction of the appearance of wrinkles and expression lines of over 50% after 28 days.
- Best added to skin serums and creams to target wrinkles around eyes, mouth, and forehead.

**Use:** Recommended use level 1-4%. Add as is at the end of formulation process or to finished creams & lotions. For external use only.

**Applications:** Anti-aging & anti-wrinkle creams and face serums, can also be combined with other anti-wrinkle active ingredients.

**Solubility:** Water-miscible

**Preservation:** Preservative-free

**Storage:** Store light-protected at a cool and dry place.

**Country of Origin:** France

**Raw material source:** Amino acids
