## 4 FIRST AID MEASURES

**Eyes:** In case of contact with eyes, rinse thoroughly with plenty of water and seek medical advice. After ingestion summon a doctor immediately.

**Inhalation:** When inhaled, remove to fresh air and seek medical attention. After contact with the skin in case of contact with skin wash off immediately with soap and water.

**Skin:** Remove soiled or soaked clothing immediately.

**Ingestion:** Immediately have the victim drink plenty of lukewarm water to vomit. Get medical advice. If the victim is unconscious, do not induce vomiting and do not give anything into the mouth.

## 5 FIRE-FIGHTING MEASURES

**Suitable (and unsuitable) extinguishing media:** May be combustible at high temperatures. Use appropriate media (water spray jet, alcohol-resistant foam, dry powder) for adjacent fire. No unsuitable extinguish media listed.

**Special protective equipment & precautions for firefighters:** Wear self-contained, approved breathing apparatus and full protective clothing, including eye protection and boots. Use water spray to cool unopened containers. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

**Specific hazards arising from the chemical:** In case of fires, hazardous combustion gases are formed: Carbon monoxide (CO), Nitrous gases (NOx), and Hydrogen chloride (HCl). Heating or fire can release toxic gases. Do not allow run-off from firefighting to enter drains or water courses. See also the Stability and Reactivity section.

## 6 ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment & emergency procedures:** Do not try to clean up the leak without proper protective equipment. See section 8 for recommendations on the use of personal protective equipment.

**Environmental precautions:** Avoid liquid release into sewers/public water. Notify environmental authorities in case of large leaks.

**Methods and material for containment and cleaning up:** Contain spillage and then collect with non-combustible absorbent material (sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations.

## 7 HANDLING & STORAGE

**Precautions for safe handling:** Advice on safe handling open and handle container with care. Advice on protection against fire and explosion. Observe the general rules of industrial fire protection. See section 8 for recommendations on the use of personal protective equipment.

**Conditions for safe storage, incl. any incompatibilities:** Keep the container tightly closed when not in use. Keep in a cool and dry place. Containers that are opened must be carefully released and kept upright to prevent leakage. The material can be frozen and delaminated at low temperatures in the winter. In case of the product is frozen, use the material after melting at 30-40°C and mixing evenly. Keep away from incompatible materials (see section 10 for incompatibilities).

### Personal Protection:

**Eyes:** Eye protection such as chemical splash goggles and/or face shield must be worn when possibility exists for eye contact due to splashing or spraying liquid, airborne particles, or vapor. Contact lenses must not be worn.

**Inhalation:** Respiratory protection if there is a risk of exposure to high vapor concentration.

**Body:** Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene. Wash hands and other exposed area with mild soap and water before eating, drinking, smoking, and leaving work.

**Other:** Use good personal hygiene practices. Wash hands before eating, drinking, smoking, or using toilet facilities. Promptly remove soiled clothing and wash thoroughly before reuse.
