

Coconut Water

Specification Sheet

Description: Coconut Water is the liquid collected from ripe coconuts.

CAS: 8001-31-8, 56-81-5

INCI Name: Cocos Nucifera (Coconut) Liquid Endosperm (and) Glycerin (and) Cocos Nucifera (Coconut) Fruit Juice

Composition: Cocos Nucifera (Coconut) Liquid Endosperm, Glycerin, Cocos Nucifera (Coconut) Fruit Juice, Sodium Benzoate, Lactic Acid, Potassium Sorbate

Appearance: Colorless to pale yellow liquid, mild characteristic odor.

Benefits:

- Contains various electrolytes (calcium, potassium, sodium, phosphorus and magnesium), monolaurin, lauric acid, and plant hormones (cytokinins) including kinetin and kinetin riboside. Cytokinins are known to promote actively plant cell division, cell growth and differentiation.
- Has potent antioxidant, moisturizing, revitalizing, anti-aging, and skin-whitening properties.
- Supplies skin and hair with natural minerals and nutrients.

Use: Add to formulas to the water phase. Typical use level 1 - 10%. Preserved with sodium benzoate and potassium sorbate. For external use only.

Applications: Moisturizers, lotions, toners, serums, & gels, hair care products, color cosmetics.

Solubility: Water-soluble

Preservation: Sodium benzoate and potassium sorbate

Storage: Store in a closed container at a dry place at room temperature.

Country of Origin: USA

Raw material source: Cocos Nucifera (coconut), glycerin made of naturally derived oils.

Manufacture: Coconut water is made from the cold-processed juice of ripened coconuts which ensures that valuable nutrients and antioxidants are retained.
