

Spring Colored Eye Shadow

(Sample Recipe for Ultramarine Blue)

Spring Colored Eye-Shadow		
Phase A	Weight %	For 20 g /0.7 oz
Mineral Base	81 %	16.2 g / 0.6 oz
Magnesium Stearate	5 %	1 g / 1/2 tsp
Phase B		
Ultramarine Blue	4 %	0.8 g / 1/4 tsp
Phase C		
Mica Patina Silver	10 %	2 g / 1 tsp
Method		
Give Phase A into a clean mortar and blend well with the pestle.		
Add phase B to Phase A and blend well with the pestle or divide Phase A to make multiple colors.		
When Phase C is added the pestle should not be used anymore.		
Alternative colors are for example: ultramarine blue instead of the ultramarine pink or a combination of the two to create purple.		
Diamond Cluster can also be used instead of the patina silver or in combination to give more sparkle.		
The proportions of the colors can be changed, by adding more to create more intense shades or less for lighter pastel shades.		
Properties		
Loose eye shadow to be used with small shaker/sifter jars.
