

Orange Peel Butter

Specification Sheet

Description: Contains orange peel oil and orange peel wax (cold pressed) together with almond oil and vegetable oils. Natural fragrant butter that adds moisturizing, antioxidant and anti-irritant properties to skin care products. Yellow-orange solid fat, characteristic odor. Soluble in oils, insoluble in water.

CAS: 8007-69-0, 8008-57-9

INCI Name: *Prunus amygdalus dulcis* (sweet almond) oil, *Citrus aurantium dulcis* (orange) peel oil, *Citrus aurantium dulcis* (orange) peel wax, hydrogenated vegetable oil

Benefits:

- Effective emollient shown to have moisturizing, antioxidant, soothing and anti-irritant properties
- Very fragrant butter with natural scent of orange peel for making delicious creams, lotions, pomades and peels
- Easily spreadable. Will melt on contact with skin

Use: Melt before use, typical use level 3-100%. Can be used pure for skin treatments. External use only.

Applications: Lotions, creams, sun care & after sun products, moisturizers, body butter and hair care, ointments.

Country of Origin: USA

Raw material source: Orange peel and hydrogenated almond oil and other vegetable oils

Manufacture: Orange peel butter is produced by blending hydrogenated vegetable oils with finely ground orange peel

Animal Testing: Not animal tested

GMO: GMO free but not certified

Vegan: Does not contain animal derived components
